SEAMLESS NECKTUBE

SD-CT4

The multifunctional cold-weather base layer essential. The Seamless Necktube is built from carbon fabric with antibacterial fiber, antistatic system and seamless technology – usable as a neck warmer, hairband or helmet liner. Thermal regulation, odour prevention and maximum comfort against the skin. One accessory, multiple solutions.

TECHNICAL DETAILS

UNIQUE

COMFORT & DESIGN

Seamless Ergonomic Fit: Advanced seamless tubular construction for a close, friction-free second skin feel.
Soft-Touch Face & Neck Comfort: Soft fleece fabric selected for gentle, irritation-free contact with sensitive facial and neck skin under the helmet.

FUNCIONALITY

Multi-Use Neck Tube: Highly versatile tubular design usable as a neck warmer, headband, or helmet liner.
Quick-Drying Base Layer Fabric: Engineered quick-drying fabric that rapidly evacuates moisture from the skin surface to prevent chilling.

SECURITY & PROTECTION

Seamless Hygienic Construction: Seamless knit construction eliminating friction points and maintaining hygienic freshness under the helmet.

TECHNOLOGY & MATERIALS

Seamless Carbon Fabric: Next-generation seamless carbon fabric for ultimate breathability and friction-free comfort.
Antibacterial Fiber Tech: Silver-ion antibacterial treatment bonded at fibre level, permanently inhibiting odour-causing bacterial growth.
Antistatic Base Layer Tech: Antistatic fiber system conducting electrostatic charge away before it builds to a discharge threshold.
