

DATA SHEET

5/16 x 5/16 CHARGE HOSES

DESCRIPTION

Coloured charge hoses, made of synthetic rubber with high resistance to refrigerant gases and with low permeability. They have a braided reinforcement to increase their resistance. The said rubber is also highly resistant to weathering and aging. Available in red, yellow and blue colours. The threaded terminals are made of brass. Its supplied with terminal gaskets made of PTFE (Teflon).

TEMPERATURE RANGE

The working temperature range of this product is from -30°C to 110°C

WORKING PRESSURE

The maximum recommended pressure is between 800 and 4000 psi (55 to 275 Bar).

COMPATIBILITY

All hoses are with female thread of 5/16 for gases R410A y R32.

AVAILABLE LENGTHS

The length is 1.500mm.
