

Designed to provide comfortable patient positioning for gynaecology procedures, the entry level G1 model is available with either electric or hydraulic height adjustment, and is supplied with leg supports, stainless steel debris tray, arm support loops and a matching D cushion for patient comfort. This model features a manually adjustable backrest and a seat section with cut-away design for gynaecology examinations. The backrest fully supports the patient in sitting and can be quickly lowered to provide a patient recovery position if required. A seat extension can be added as an option to fully support the patient in supine or prone lying.
