

# AZUD TUB

Microirrigation pipes: microtubes and commands.

What is it?

Application

Advantages

AZUD micropipes are divided among the different models and main applications of the same.

- It can be buried together with the distribution pipes to remotely operate the hydraulic valves.
- It is used as hydraulic command in the filtration equipment and the hydraulic irrigation installations.
- It is used in hydroponic thanks to its flexibility and its thickness.
- It is used for the insertion of drippers and microirrigation fittings.
- Manufactured with first quality raw materials.
- Eases the maintenance and the future enlargement of the installation.
- Reinforced packaging: easy transport and storage. Stackable.
- The insertion of drippers and fittings is easy and flexible.

Type	Diameter mm	Application	Colour	Coil	Microtube cuts
PE	6.5x4.5 mm	Drippers	Black	1300 m	0.6m / 1m
FLEX	5x3.3 mm	AZUD NAVIA online drippers	Black and white	800 m	0.4m / 0.6m
FLEX	6x4 mm	Drippers	Black	1500 m	-
FLEX	6.5x4 mm	Hydroponic	Black	-	0.5m / 0.6m
PE	8x5.6 mm	Hydraulic command	Black with purple line	800 m	-
PE	8x5.6 mm	Hydraulic command	Black	800 m	-
PE	8x6 mm	Hydraulic command	Black	800 m	-
FLEX	7x4.3 mm	Microsprinkling	Black	1100 m	0.6m

**Note:** Ask AZUD for different lengths in the cut of micropipes.
