## SPECIFICATIONS

### GX4 GAMING CHAIR

#### SKYDEX Innovation

SKYDEX technology inside every GX4 Gaming Chair uses engineered geometries to better distribute seated pressure. Conforming to the user's shape with gradual compression, it offers enhanced comfort throughout the day.

#### Ultra Arm Adjustability

BodyBilt's height-adjustable Optima Arms provide both ergonomic adjustment and stability.

#### Sturdy Steel Construction

From the heavy-duty cylinder to the reinforced steel brace bars and additional steel plate, GX4 Gaming Chair is designed for long-term intensive use durability.

#### Upholstered Head and Neck Support

The GX4's fore/aft neckroll is made to fit behind the neck, providing extra support for the head and comfort that you can lean back into. Adjustable in height, angle, and bend settings.

#### Seating Satisfaction

Features a reinforced seat that is 22% larger than average seats, accommodating gamers above the 80th percentile. Plus the added cushion and support of the innovative SKYDEX technology.

#### Adjustable Arms

The GX4's center-locked Optima Arms' ensures you don't have to compromise healthy wrist and arm postures.

#### Comfortable Contoured Seat

The minimally-contoured BodyBilt seat fits 90% of seated gamers and provides more surface area for contact.

#### High Back Design for Greater Shoulder Support

Sleek design allows freedom of motion. As you recline or reach, the frame doesn't impede or hit the worker's arm or shoulder.

#### Inflatable Air Lumbar

Lower back support is crucial for a healthy seated posture. This feature allows you to inflate the lumbar area to adjust the firmness of the backrest. Increase and decrease to your specific needs.

#### Brilliant Free-Float Mechanism

The E-style or "knee-tilt" mechanism allows you to achieve a deep rocking motion when the tilt lever is raised in the free float position. This supportive mechanism features the adjustments you need to get into the perfect position for each gaming session.

**PREMIUM COMFORT FOR  
GAMING WITH EXTENSIVE  
ADJUSTABILITY**
