HandiMate™ Optical Interconnect Maintenance Solutions

Seikoh Giken releases the latest addition to their TechMate™ line of optical connector cleaning and restoration product.

The New HandiMate™ SHM-502 enables users to clean Duplex LC and Duplex MU connectors in addition to Simplex SC, FC, ST, LC, and MU connectors with a simple, handheld method of removing all types of dust and debris from optical connectors.

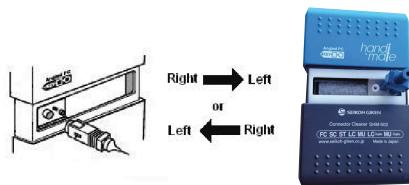

The unique "Slide-Guide" connector holder in combination with the "Clean and Advance" tape technology continuously provides a fresh cleaning surface after each use.

Key Features

- Easy operation and good workability in the field thanks to its palm sized body and lightweight cleaning operation. An excellent cleaning tool for outside plant technicians.
- Stable, consistent cleaning performance regardless of operator skill thanks to its patented connector insertion "Slide-Guide" holder.
- Duplex connector cleaning in one simple operation cuts cleaning time in half greatly reducing technician's time in the field.
- Automatic "Clean and Advance" tape technology provides a fresh cleaning surface for each use eliminating waste and guaranteeing long tool life.
- Disposable with over 500 times cleaning.
- Aggressively priced when compared to other hand-held field cleaning tools.
- ESD Anti-static materials, Supports both PC and APC Endface designs.

Applications

- Customer premises troubleshooting / maintenance
- Hubsite, CO, Headend routine maintenance
- New Installation / Assembly environments
