HandiMate™ Optical Interconnect Maintenance Solutions

HandiMate™ Cleaning tool provides a simple, handheld device to assist in removing all types of dust and debris from optical connectors.

It is highly effective as a dry cleaner against contaminants such as dirt, lint and oils. The HandiMate also supports wet cleaning processes to remove heavier debris. The patented “Slide-Guide” feature uses

Seikoh Giken’s unique “Clean and Advance” Technology to continuously provide a fresh cleaning surface after each use.

■ Key Features

- Palm sized, Lightweight package, easily fits into tool kit
- Non-woven microfiber material supports both dry and wet cleaning processes
- Continuous “Clean and Advance” technology controls material and reduces waste
- Patented “Slide-Guide” supports both 2.5mm (FC,SC, ST) and 1.25 (LC,MU) ceramic ferrules
- Supports both PC and APC polish types
- Pop-up cover prevents contamination of cleaning material
- Up to 500+ cleanings per unit
- ESD Anti-Static materials

■ Applications

- Customer premises troubleshooting / maintenance
- Hubsite, CO, Headend routine maintenance
- New Installation / Assembly environments
