TEKA

TEKA

Your fries,
now in
the oven

Prepare frozen or precooked fried potatoes, chicken wings or nuggets in a quick and easy way.

Fresh vegetables will taste juicy and crispy at the same time, just add a few drops of oil and have fun.

Easily access the Air Fry function on your oven panel and enjoy a perfect result in a cleaner and safer way.

FryMaster **Box**

Don't turn the food around!

The Teka AirFry Oven has a specially perforated tray, which allows perfect air circulation, so that food cooks evenly and without having to turn it over.

Also the oven incorporates **Surround Temp** technology, an additional rear heating element, which guarantees the cooking of food at a more stable and homogeneous temperature.

Save space in your kitchen

An extra feature, and extra appliance, now included in your oven with the AirFry function.

Comfort in your kitchen with the telescopic guides turning it more comfortable and safer to handle food on the trays, even when the oven is hot.

And so
much more...

XXL **Capacity**

Cook a wide variety of recipes for the whole family.

Thanks to its capacity of 71 liters, you can prepare 30% more food than in a conventional oven.*

Extra savings

Combining efficiency and technology. Do not worry about the energy expenditure while cooking.

Teka's AirFry Oven has an A+ energy rating that allows you to save more than 20% on your monthly electricity bill.*

*compared with other Teka models
