At last, everything fits.

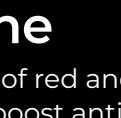

TEKA

Seamless design and **cutting-edge freshness.**

AI Purine-Control
With AI Purine-Control Technology, reduce purine levels by up to 50%, minimizing health risks from seafood while preserving its flavor at optimal temperatures between -1.5°C and 3°C .

Antiox Zone

Harness the power of red and blue light waves to naturally boost antioxidants like anthocyanins and chlorophyll, keeping your fruits and vegetables fresher, longer.

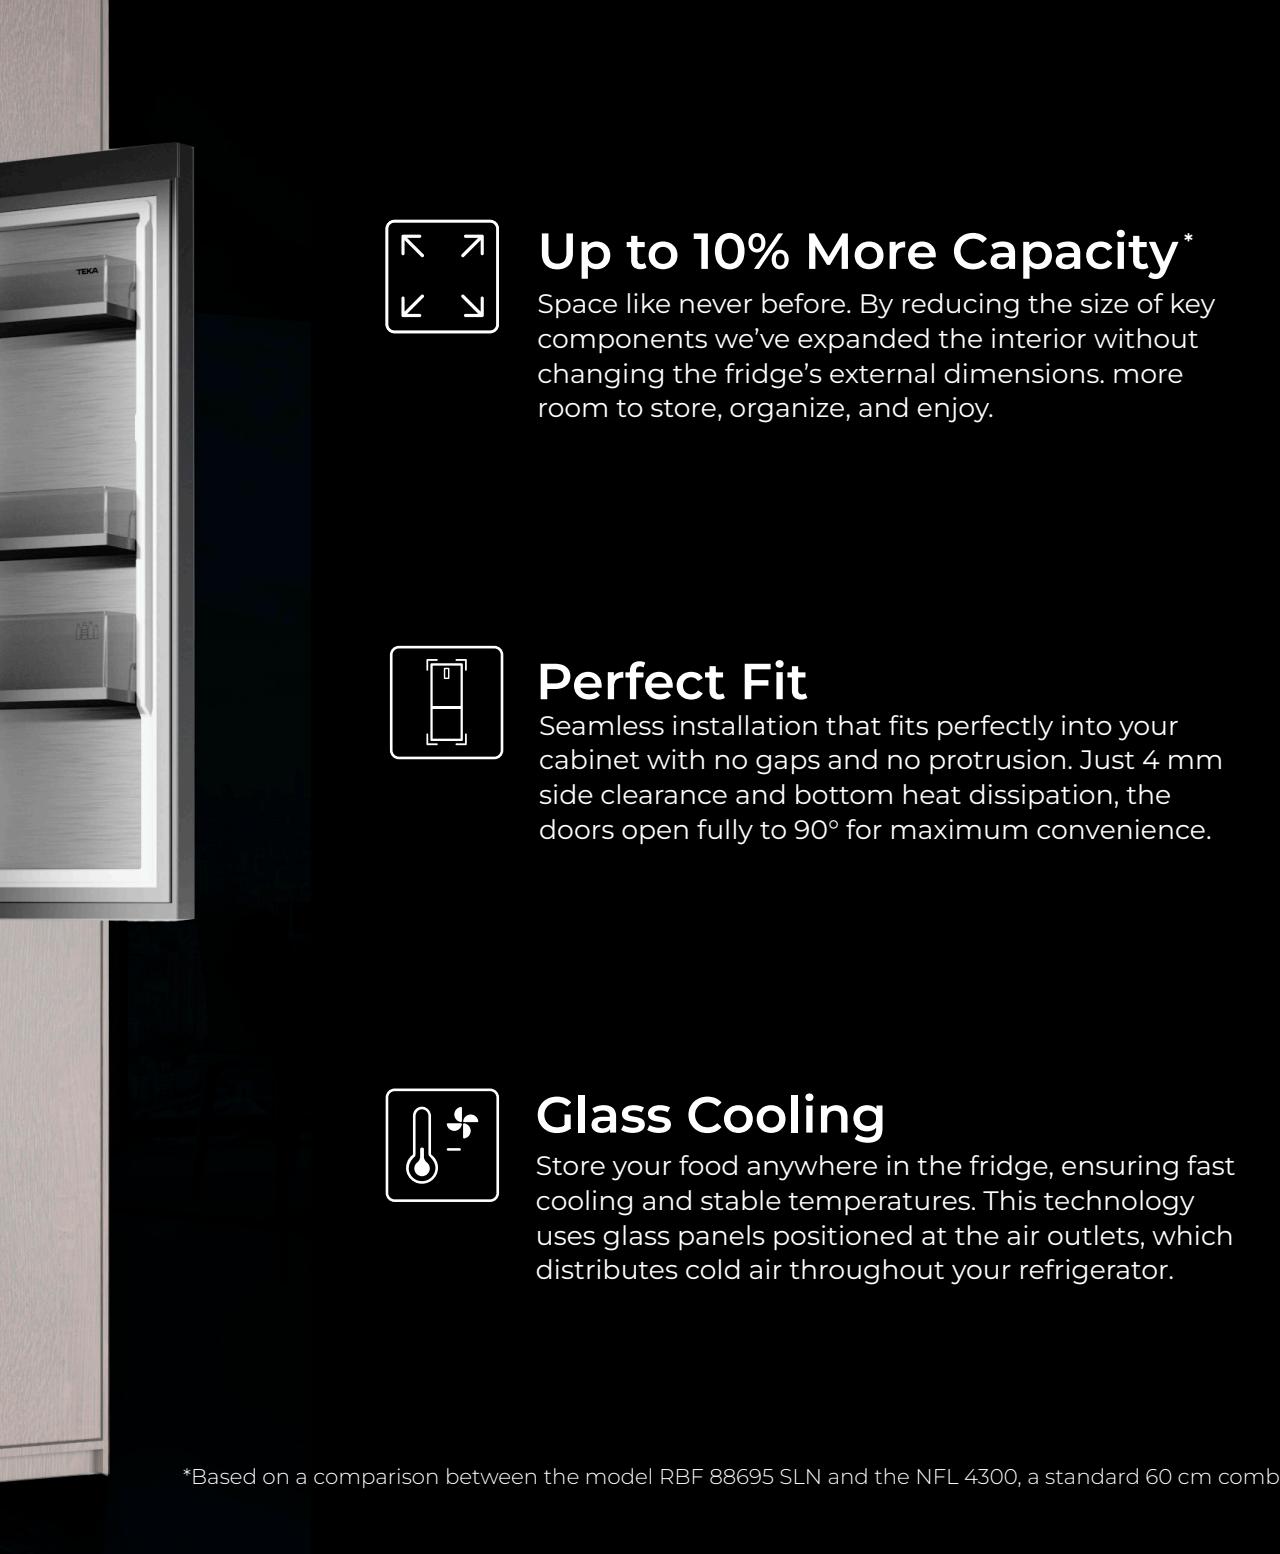

BioPure Zone

With AI Purine-Control Technology, reduce purine levels by up to 50%, minimizing health risks from seafood while preserving its flavor at optimal temperatures between -1.5°C and 3°C .

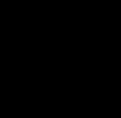

IonGuard Technology

A system that uses ionized air combined with metal catalysis to protect food from odors and degradation, helping maintain optimal freshness and hygiene inside your fridge.

Up to 10% More Capacity*

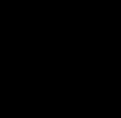

Space like never before. By reducing the size of key components we've expanded the interior without changing the fridge's external dimensions, more room to store, organize, and enjoy.

-30°C

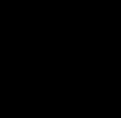

UltraFreeze Box

Experience superior food preservation with a ultra-low temperature system that freezes at -30°C , locking in freshness and flavor instantly. It preserves the natural texture, nutrients, and taste of your food.

Perfect Fit

Seamless installation that fits perfectly into your cabinet with no gaps and no protrusion. Just 4 mm side clearance and bottom heat dissipation, the doors open fully to 90° for maximum convenience.

Glass Cooling

Store your food anywhere in the fridge, ensuring fast cooling and stable temperatures. This technology uses glass panels positioned at the air outlets, which distributes cold air throughout your refrigerator.

*Based on a comparison between the model RBF 88695 SLN and the NFL 4300, a standard 60 cm combi refrigerator.

IceBox

From pure water to perfect cubes, this is where freshness takes shape. Silently, effortlessly. Fresh cubes on demand, perfect for every moment, from quick drinks to weeknight gatherings.
