GUARANTEED DURABILITY

A TOUCH OF DISTINCTION AND CLASS **FOR YOUR KITCHEN**

The new kitchen sinks and taps come in exclusive colors in PVD. The gold metallic decoration gives a luxurious appearance, while titanium is the latest decoration trend.

The color of the material is obtained by the evaporation of the metal that adheres to the surface creating a color layer.

Teka sinks are recognized by their flexible installation: top, flush or undermount installation. Meanwhile our trendy taps will give the final touch to your kitchen.

MORE RESISTANT

Thanks to PVD treatment, physical vapor deposition, the natural hardness of stainless steel is increased. Top quality finishes for convenient and easy cleaning.

ANTI-FINGERPRINT FINISH

The anti-fingerprint coating of the new kitchen taps creates a barrier that prevents the intrusion of oxygen and moisture.

CERTIFIED BY EUROPEAN NORM REQUIREMENTS

Its durable treatment passes extreme chemical attack tests.

The best of their kind.

SILENTSMART TECHNOLOGY

Reduces the water noise when running or dripping into the sink.

BOWLS WITH A DEPTH OF 20 CM

Deeper, more possibilities.

Teka sinks are manufactured in the same way as a chef pampers his recipes: with the very best ingredients.

The integrated manufacturing process stands for efficient and environmentally friendly production.

Just decide which one suits **you!**
