

LEARNING FROM NATURE

Did you know that lotus flower leaves repel water and are capable of self-cleaning? This property is known as the Lotus Effect and it allows dirt particles to be picked up by water droplets, preventing them from sticking to the surface.

Discover the new sinks with PureClean treatment.

THE FIRST SINK WITH A SELF-CLEANING SYSTEM

NEVER STOP BELIEVING IN MAGIC

PureClean sinks' improved formula keeps the surface cleaner and drier with every use.

DURABILITY

Manufactured from 1mm thick stainless steel, they are the first PureClean range of sinks with a polished finish, maintaining premium quality and strength for greater durability. This is why we offer a Lifetime Warranty exclusively on our stainless steel against any manufacturing defects.

DESIGN

A design created to make things easier for you: maximum capacity and cleanliness.

The 15 radius makes it easy to clean and drain the water. The decorative elements elegantly cover the base of the sink. Greater capacity with a depth of 200mm.

EASE OF USE

The new patented and innovative design of the **HelixPro** basket gives a minimalist touch to the sink thanks to its ergonomic and practical look.

It features the new **PerfectFlow** drainage system which eliminates any barrier for water to drain away with ease, which prevents dirt and bacteria from building-up

Teka won an award at the Delta Awards 2022 for its stainless steel sink design.

HYGIENE AND CLEANING

The PureClean treatment transforms the surface of your sink into an area that repels water, so you will have a cleaner and drier sink that also prevents the buildup of bacteria.

In addition to the antiseptic benefit of stainless steel, this coating can drag away limescale, dirt, and all types of particles that previously remained on your sink's surface, giving you a cleaner and more hygienic product.

OUR COMMITMENT

Our work is endorsed with the ISO 14001 certification that recognizes the correct management of the processes to preserve the surroundings. We demonstrate our environmental commitment by using 100% renewable energy sources (solar and wind), optimizing processes, resources and waste without diminishing quality and essence.

At Teka, we seek to offer a more sustainable product taking care of our planet with every step we take.

A BARRIER-FREE SURFACE
