

LEARNING FROM NATURE

Did you know that lotus flower leaves repel water and are capable of self-cleaning? This property is known as the Lotus Effect and it allows dirt particles to be picked up by water droplets, preventing them from sticking to the surface.

Discover the new sinks with PureClean treatment.

NEVER STOP BELIEVING IN MAGIC

The first self-cleaning stainless steel sink that instantly keeps the area dry and clean.

DURABILITY

Stainless steel of the highest quality and strength. This is why we offer a Lifetime Warranty exclusively on our stainless steel against any manufacturing defects.

ANTI-FINGERPRINT DESIGN

An impeccable result with the premium **SoftTexture** finish that provides an anti-fingerprint surface and a matte-look that perfectly matches the latest trends in kitchen design.

DESIGN

A design created to make things easier for you: maximum capacity and cleanliness.

The 15 radius makes it easy to clean and drain the water. The decorative elements elegantly cover the base of the sink. Greater capacity with a depth of 200mm.

HYGIENE AND CLEANING

The PureClean treatment transforms the surface of your sink into an area that repels water, so you will have a cleaner and drier sink that also prevents the buildup of bacteria.

In addition to the antiseptic benefit of stainless steel, this coating can drag away limescale, dirt, and all types of particles that previously remained on your sink's surface, giving you a cleaner and more hygienic product.
