

## Practical, comfortable, silent and safe

Teka's new organic waste disposers help to keep the kitchen free of bacteria, odors, and rubbish in a comfortable and hygienic way.

It converts the waste into very fine particles that are removed through the pipes, reducing the volume of rubbish in the kitchen and the amount of plastic bags that are used.

# The Eraser

NEW RANGE OF WASTE DISPOSERS

## Designed to make a difference in your kitchen

#### You are one touch away from having total hygiene in your kitchen.

Do you have organic waste in the sink? Do you know where to throw the scraps? Get rid of all of them in just three easy steps:

Forget the awkward task of removing waste from the sink by hand.

Teka's waste disposals do not have blades. Thanks to its innovative grinding wheel system, the safety of you and your family is guaranteed without losing efficiency.

## Only **benefits**

- **Greater hygiene** in your kitchen.
- **Sustainability:** reduces the accumulated rubbish as well as the use of bags.
- **Safety:** Teka's waste disposals do not use blades or fans for operation.
- The disposers are very **quiet**, thanks to their high-torque induction motor and their new grinding technology.
- They do not need maintenance.
- ► Their consumption of water and energy is **minimal**.

## Did you know ...?

Teka's waste disposers are designed for any type of sink; they only need a  $3^{1/2}$  valve in addition to a grounding point for installation and optimal operation.

A mounting adaptor for sinks with square valves is available as optional accessory.

A 50mm drain is the best size to install the disposer.

They can practically eliminate any type of organic residue, even chicken bones. Avoid shell debris from some molluscs and foods with fibre or that are especially greasy, such as banana or onion skins.
