Update..... 14

Overview 15

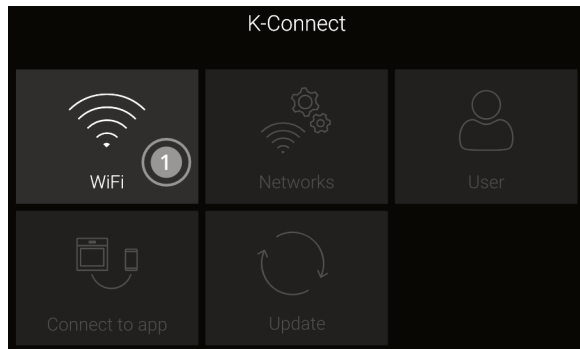

WiFi Setup

When „Eco Mode“ is active, the „K-Connect“ function is not available. To use the function, „Eco Mode“ should be turned off: Settings > Eco Mode > Off

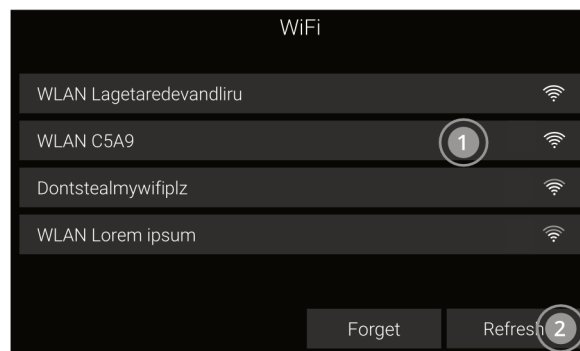

Also, the date and time must be set (First setting or Settings > Date and time) to the correct values. Otherwise, the connection to the server won't work.

1. Select „K-Connect“

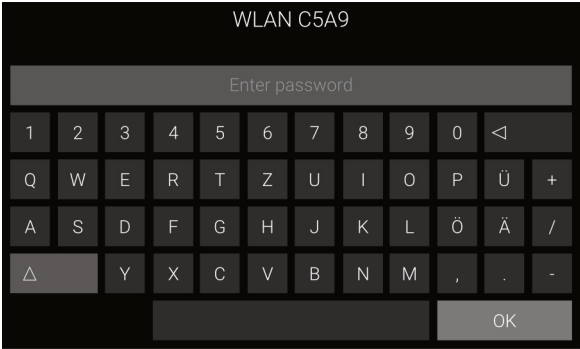

1. Select the WiFi function

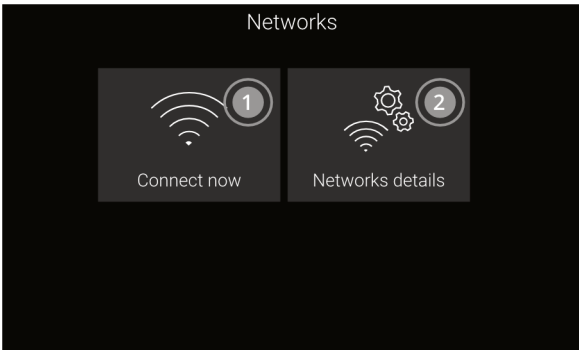

1. Selection of the network

2. Update network search

WiFi Setup

Enter the Password

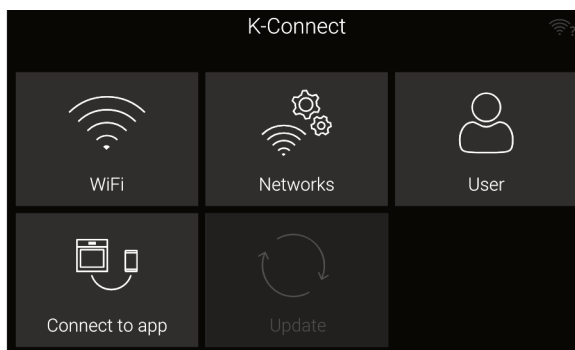

- 1. Connect to the network
- 2. Networks details

If user selects a network, introduces its password and presses on "Connect now", the connection process will start. The oven will automatically show the main menu.

The connection is successful

If the password has been entered incorrectly, it must be entered again. To reenter the password: Networks > Network details > Password

Connection to the server is not correct:

- System' date and/or time are incorrect
- Network's incorrect password
- External server problem

Connect to the app

The app is available for Android devices and can be downloaded from Google Play Store.

User creation by introducing name, mail and password

1. Add appliance

Connect to the app

1. Select „Connect to app“

1. To the next step

2. Cancel

Scan QR code with the app

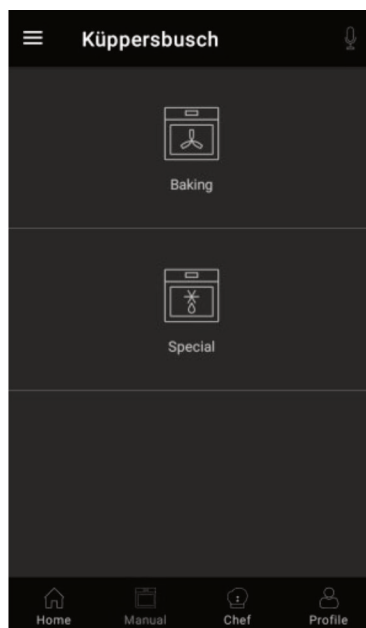

When the APP recognizes the code, introduce a name for the oven and its serial number (the serial number of the oven can be found on the label in the right side of the cavity's edge).

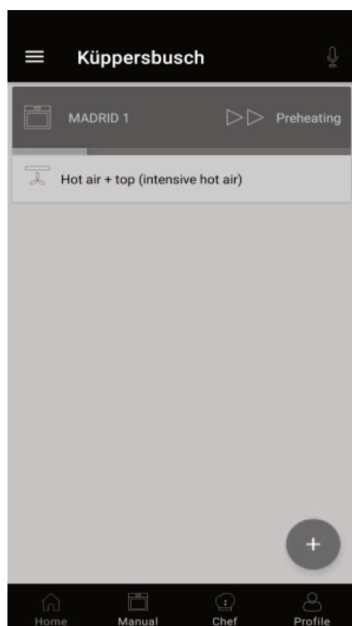

Connect to the app

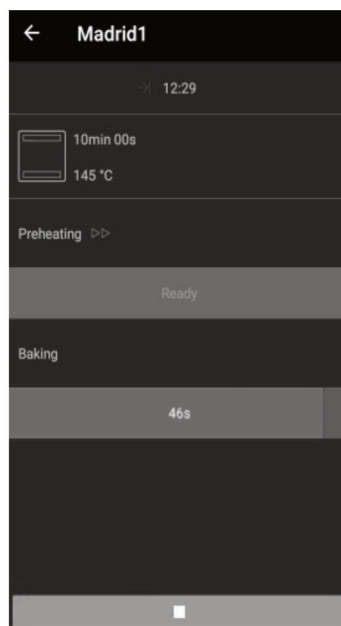

Once the serial number is correctly introduced, the oven will return automatically to the main menu screen and the APP will show the home tab showing the list of linked ovens

On the APP, though the oven's card in the home tab (shortcuts to every available cooking functions and current state of the oven) or using the Manual and Chef tabs, cookings can be sent cookings to the oven.

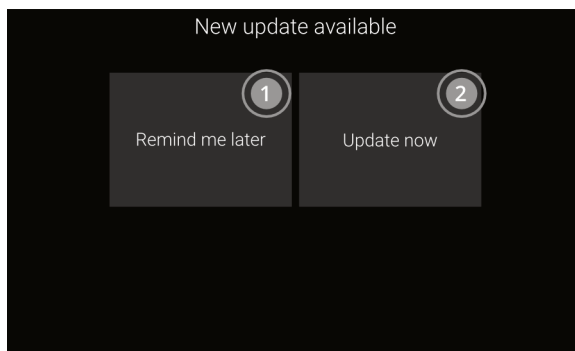

Once the cooking is sent via APP, the cooking process will start in the oven. On the HOME tab of the app, the current state of the oven will be realtime updated. To get further information of the cooking process, press on the card of the cooking.

On the cooking screen, if the Stop button is pressed, the cooking can be stop via APP.

Update

Once the oven is connected, it will automatically check if the oven's SW version is updated. In case it has an older version, the update icon will appear next to the Wi-Fi symbol and a message will appear on the screen.
