# FORLINE SERIES

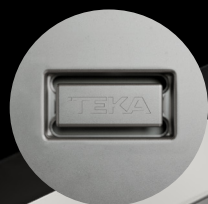

**TEKA**

FORLINE SERIES

# DURABLE DESIGN

Its finish and modern lines reflect the latest design trends, creating a simple yet sophisticated sink. Made from stainless steel, it offers a combination of capacity, style, and durability you need to make your daily life more convenient.

New overflow

HelixPro basket + PerfectFlow system

## TIMELESS ELEGANCE

Featuring the HelixPro basket and the PerfectFlow drainage system, it eliminates the rim between the basket and the sink. It also includes a new rectangular overflow, a more hygienic design with no surrounding frame.

## 2 IN 1 INSTALLATION

Two different options for a better integration in your kitchen: top or flush mount.

## GREATER **CAPACITY**

With a generous bowl depth of 200 mm, it provides a large capacity for household items of various sizes.

## **SILENTSMART** TECHNOLOGY

Its low-noise components reduce noise by 50% when water drips or runs in the sink, ensuring your comfort all day.

## EASY **CLEANING**

Its 15 radius offers a modern design that makes it easier to clean your basin and the water also flows smoothly.

## **QUALITY** FOREVER

Because we trust in our quality standards, we give you the best: a Lifetime Warranty on our stainless steel against any manufacturing defects. Sinks manufactured in Spain.

## OUR **COMMITMENT**

Our work is endorsed by the ISO 14001 certification, which recognises the correct processes management to preserve the environment: using renewable energy sources (solar and wind), optimizing processes, resources and waste without diminishing product quality and essence.
