

UNIVERSAL FULL SET

- Modern design and finish.
- 360° swivel spout for easy water flow direction, improving handle mobility.
- Easy-Quick system for fast and simple installation without tools.
- High-precision temperature control.
- Cartridge with high-resistance ceramic discs and smoother movement.

RANGE

MAIN FEATURES

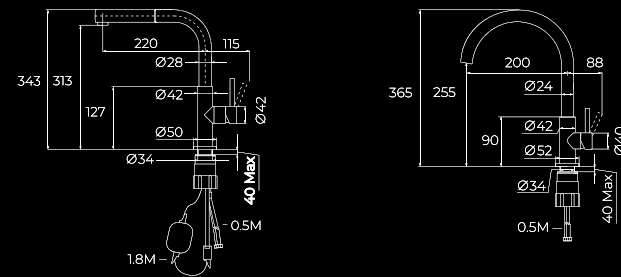

Color	Polished inox and matte black	Polished inox and matte black
Stainless steel (AISI 304)	✓	✓
High spout	✓	✓
360° swivel spout	✓	✓
Anti-scale ECO aerator (5 l/min)	✓	✓
ECO cartridge (cold start)	✓	✓
Pull-out hose	✓	-
Water Jet	Normal	Normal
Ceramic disc cartridge	✓	✓
Easy-Quick fixation	✓	✓
Flexible inlet hoses 3/8" o 1/2"	✓	✓

UNIVERSAL SERIES

Style and efficiency

UNIVERSAL SERIES

THE PERFECT TANDEM ELEGANCE AND SUSTAINABILITY

Universal is much more than finely designed aesthetics with high-durability finishes. It is the ultimate eco-sustainable tap, contributing to environmental conservation thanks to its 100% stainless steel manufacture, water flow limiter and cold open start.

It is not just a tap, it is the best representation of a thoughtful, modern, and functional design.

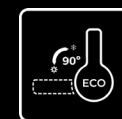

EFFICIENCY IN EVERY USE

Its design enhances efficiency and savings by reducing water and energy consumption. Furthermore, it helps preserve resources and lower the carbon footprint while consistently maintaining performance.

WATER SAVING

The anti-lime aerator limits the water flow, reducing it to a maximum of 5 l/min at 3 bar without compromising pressure. The water flow remains efficient and consistent, ensuring no noticeable difference in your daily activities.

LOWER ENERGY CONSUMPTION

The cold start prevents hot water from being activated automatically when the tap is turned on. This reduces unnecessary energy use for heating water and decreases gas or electricity consumption.

THE POWER OF STEEL

Made from high-quality stainless steel—a non-porous, antibacterial material—it is ideal for the kitchen environment. Its smooth, shiny surface is corrosion-resistant and easy to maintain, ensuring your tap that always looks impeccable.

GREATER PRECISION

Equipped with the Neoperl® aerator, which mixes water and air to create a fuller stream. This helps prevent splashes and limescale build-up, for more precise control of the water flow.

** Products compatible with prestigious certification systems for sustainable buildings.*
