

DISCOVER THE NEW SOMMELIER WINE COOLER SERIES

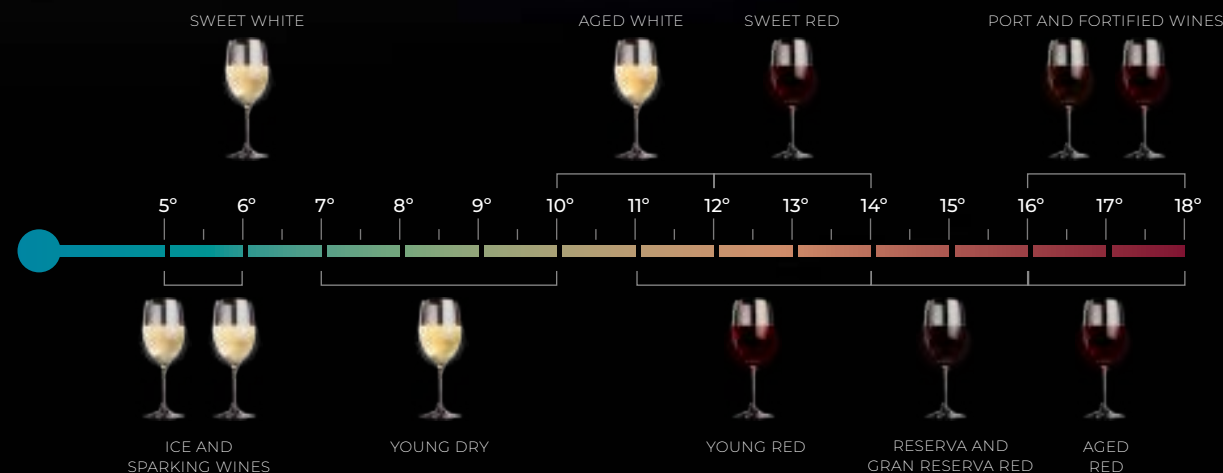

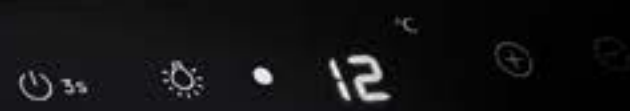

Passion for wine.

TEKA

EACH BOTTLE OF WINE AT THE IDEAL TEMPERATURE

Each wine has an ideal temperature for consumption, this being the temperature at which all its nuances and qualities have been achieved.

The new Sommelier Wine Cooler series has been manufactured using the latest technology to ensure that each wine is at the perfect temperature at the time of consumption.

UP TO 3 SEPERATE AREAS

Our wine coolers feature PerfectTemp technology, with up to three temperature areas, enabling you to store a combination of red, white and sparkling wines at different temperaturas, ready for consumption in perfect condition.

SURROUNDAIR TECHNOLOGY

Teka's innovative SurroundAir cooling system ensures the air in the wine cooler is distributed and recirculated evenly, maintaining a constant and homogeneous temperature in every compartment.

SMARTCONTROL SYSTEM

A stable temperature with no variations is essential to storing wine in perfect condition. The SmartControl system prevents any such variation in temperature, thereby guaranteeing the wine is kept in the best condition.

THE EXACT STORAGE CONDITIONS

Taking meticulous care of every detail is essential when storing wine in order to enjoy its full flavour.

The new Sommelier wine coolers feature the latest cutting-edge safety systems to guarantee the best experience.

HUMIDITY CONTROL

Humidity Control technology guarantees the ideal level of humidity, oscillating between 55% - 75%. This ensures the bottle is kept in perfect condition, as well as preserving the aroma of the wine.

DOUBLE TINTED GLASS

The double tinted glass door protects the bottles from light and UV rays, thereby preventing the premature aging of the wine and loss of flavour.

ANTI-VIBRATION SYSTEM

This system absorbs and dampens any vibration, thereby preventing wine fatigue and preserving its flavour.

ACTIVE CARBON FILTER

Designed to constantly renew and purify the air in the wine cellar to achieve the optimal environment for preserving the wine.

A SEDUCTIVE DESIGN

The stylish, minimalist design of these wine coolers ensures they fit perfectly into your kitchen, blending in with the other décor in the room.

DIGITAL SCREEN

This screen enables you to configure the wine cellar quickly and easily. In addition, it displays the temperature inside the wine cooler.

DETAILED INTERIOR DESIGN

The inner shelves are made of wood and feature removable telescopic guides for greater convenience.

EFFICIENT LIGHTING

The interior features a stylish and customisable lighting system which can either be left on permanently or turned on when the door is opened.

TOTALLY VERSATILE

The door is reversible and enables you to change the direction in which it opens, depending on the space in question.
