

CO KNX IPR

KNX IP Secure Router

- Allows the forwarding of telegrams between different lines via a LAN (IP) network as a fast backbone.
- Has an extended filter table for the main group 0.31 and stores up to 150 telegrams.
- Can be used as a programming interface.
- Compatible with KNX IP Security and KNX Data Security, which protects the device from unauthorised access via the KNX bus.
- As a Secure Interface (tunneling), it prevents unauthorised access to the system. The connection between PC and interface is encrypted.
- The IP address can be assigned via DHCP or the ETS®.
- Its keys and LEDs enable local diagnostics.
