Description

- Multifunction actuator with 2 outputs for 1 blind/shutter control or 2 individual outputs.
- Incorporates 2 free-voltage outputs with up to 10A switching capacity per channel.
- Within the blind/shutter operation mode:
 - · Switching of electrically operated venecian blinds, roller shutters, awnings and venting louvers.
 - Safety functions: wind alarms, rain alarm, frost alarm and sun protection.
 - · Scene function, up to 8 scenarios can be predefined.
- Within the switching mode:
 - Different functions can be enabled by the ETS: time functions (ON/OFF delay, staircase lighting
- timer with warning function) logic operation, forced-control functions, scene control (up to 5),
- threshold function, etc.
 - It allows manual control of its outputs thanks to the control knobs on the front (provisional operation).
- Supplied by the Bus.
- Modular housing for DIN-rail mounting. 1-module wide.
- Programming and commissioning by ETS3 or later.
