

CT MON 01M/01F

Coin/token operated time counter
with alert

- Electronic timer operated by coins or tokens.
- Adjustable via DINUY - Configure App.
- It includes a time-out warning, which consists of a relay output that activates a short time before the main timer finishes. Its purpose is to activate a visual or audible signals as a pre-warning.
- Additional features:
 - Extra timing: allows you to assign a different timing when a number of coins/tokens exceeding the set amount is inserted.
 - Allows you to assign a different number of coins/tokens and timing according to a set schedule and calendar.
- Option to connect an external switch to pause the timer.
- White (RAL 9003) metal security with key lock.
- Spring connectors are included for easy wiring.
- Application examples: campsites, tennis or paddle tennis courts, churhces, gas stations, hospitals, laundromats, etc.

Technical characteristics

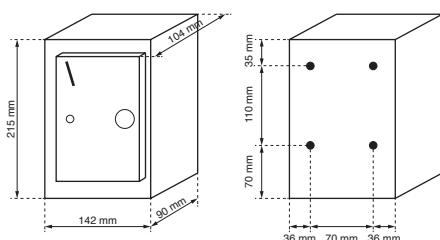

REFERENCE	CT MON 01M	CT MON 01F
Activation	Coins	Tokens
Display	No	
Supply voltage	230V- 50Hz	
Power self-consumption	< 1W	16 A (Power factor=1)
Maximum allowed current		1 sec .. 5 hours
Adjustable time bounds		1 .. 4
Coin/token limit		18 hours
Maximum accumulative time	Only 1 type (1€ coin) Other coins by demand	Reference: AC CT- 005
Coin/token type		White RAL 9003
Color		215 x 142 x 104 mm
Dimensions		IP20 according to UNE20324
Degree of protection		-10°C ~ +45°C
Working temperature
