

DANOCRET PROTECT 300 FLEX BLANCO

Version: 2

Revision: 10/04/2025

Previous revision: 09/06/2023

Date of printing: 10/04/2025

## SECTION 1: IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

- 1.1 **PRODUCT IDENTIFIER:**  
DANOCRET PROTECT 300 FLEX BLANCO  
UFI: 4600-W0NU-Q00R-48S3
- 1.2 **RELEVANT IDENTIFIED USES OF THE SUBSTANCE OR MIXTURE AND USES ADVISED AGAINST:**  
Intended uses (main technical functions): ☒ Industrial ☒ Professional ☒ Consumers  
Waterproofing mortar  
Sectors of use:  
Consumer uses (SU21).  
Types of PCN use:  
#  
Uses advised against:  
This product is not recommended for any use or sector of use (industrial, professional or consumer) other than those previously listed as "Intended or identified uses".  
Restrictions on manufacture, placing on market and use, according to Annex XVII of Regulation (EC) No. 1907/2006:  
Not restricted.
- 1.3 **DETAILS OF THE SUPPLIER OF THE SAFETY DATA SHEET:**  
DANOSA - DERIVADOS ASFÁLTICOS NORMALIZADOS, S.A.  
Polígono Industrial, Sector 9 - 19290 Fontanar (Guadalajara) ESPAÑA  
Phone number: 949888210 - Fax: 949 888 223 - www.danosa.com  
E-mail address of the person responsible for the Safety Data Sheet:  
info@danosa.com
- 1.4 **EMERGENCY TELEPHONE NUMBER:**  
902 422 452 8:30-17:30 h  
 National Poisons Information Service (NPIS) - In England, Wales or Scotland: dial 111 - In N Ireland: contact your local GP or pharmacist during normal hours.

## SECTION 2 : HAZARDS IDENTIFICATION

- 2.1 **CLASSIFICATION OF THE SUBSTANCE OR MIXTURE:**  
Classification of mixtures is carried out in accordance with the following principles: a) when data (tests) for the classification of mixtures are available, generally is carried out based on these data, b) in the absence of data (tests) for mixtures are generally used interpolation or extrapolation methods of assessing the risk, using the available data for mixtures similarly classified, and c) in the absence of tests and information which would allow to apply interpolation or extrapolation techniques, methods are used to classify risk assessment based on the data of the individual components in the mixture.  
Classification in accordance with Regulation (EU) No. 1272/2008~2022/692 (CLP):  
DANGER:Skin Irrit. 2:H315|Eye Dam. 1:H318|Skin Sens. 1:H317
- | Danger class                                                                                      | Classification of the mixture                                       | Cat.                    | Routes of exposure   | Target organs        | Effects                                  |

- Full text of hazard statements mentioned is indicated in section 16.
- Note: When in section 3 a range of percentages is used, the health and environmental hazards describe the effects of the highest concentration of each component, but below the maximum value.

- 2.2 **#LABEL ELEMENTS:**  
 This product is labelled with the signal word DANGER in accordance with Regulation (EU) No. 1272/2008~2022/692 (CLP).

- Hazard statements:

H315 Causes skin irritation.  
H318 Causes serious eye damage.  
H317 May cause an allergic skin reaction.

#- Precautionary statements:

P102 Keep out of reach of children.  
P280 Wear protective gloves, clothing and eye protection.  
P362+P364 Take off contaminated clothing and wash it before reuse.  
P303+P361+P353-  
P352-P312 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water [or shower]. Wash with plenty of water and soap.. Call a POISON CENTER or doctor if you feel unwell.  
P305+P351+P338-  
P310 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor.  
P308+P310+P101 IF exposed or concerned: Immediately call a POISON CENTER or doctor. If medical advice is needed, have product container or label at hand.

| 4.1 | <b>DESCRIPTION OF FIRST AID MEASURES:</b><br>Symptoms may occur after exposure, so that in case of direct exposure to the product, when in doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person. Lifeguards should pay attention to self-protection and use the recommended protective equipment if there is a possibility of exposure. Wear protective gloves when administering first aid. |                                                                             |                                                                                                                                                                                                                |
|     | Route of exposure                                                                                                                                                                                                                                                                                                                                                                                                                                      | Symptoms and effects, acute and delayed                                     | Description of first-aid measures                                                                                                                                                                              |
|     | Inhalation:                                                                                                                                                                                                                                                                                                                                                                                                                                            | It is not expected that symptoms will occur under normal conditions of use. | This product is not volatile. As the product is solid, hazard is rather low. Should there be any symptoms, transfer the person affected to the open air.                                                       |
|     | Skin:                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Skin contact causes redness and pain.<br>                                   | # Remove contaminated clothing. Wash thoroughly the affected area with plenty of cold or lukewarm water and neutral soap, or use a suitable skin cleanser.                                                     |
|     | Eyes:                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Contact with the eyes produces redness, pain and serious burns.<br>         | Remove contact lenses. Rinse eyes copiously by irrigation with plenty of clean, fresh water for at least 15 minutes, holding the eyelids apart, until the irritation is reduced. Call a physician immediately. |
|     | Ingestion:                                                                                                                                                                                                                                                                                                                                                                                                                                             | If swallowed, may cause irritation of the mouth, throat and oesophagus.     | If swallowed, seek medical advice immediately and show container or label. Do not induce vomiting. Keep the patient at rest.                                                                                   |

4.2 **MOST IMPORTANT SYMPTOMS AND EFFECTS, BOTH ACUTE AND DELAYED:**

The main symptoms and effects are indicated in sections 4.1 and 11.1

4.3 **INDICATION OF ANY IMMEDIATE MEDICAL ATTENTION AND SPECIAL TREATMENT NEEDED:**Notes to physician:

Treatment should be directed at the control of symptoms and the clinical condition of the patient..

Antidotes and contraindications:

Specific antidote not known.

## SECTION 5: FIREFIGHTING MEASURES

|     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| 5.1 | <b>EXTINGUISHING MEDIA:</b><br>In case of fire in the surroundings, all extinguishing agents are allowed.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 5.2 | <b>SPECIAL HAZARDS ARISING FROM THE SUBSTANCE OR MIXTURE:</b><br>As consequence of combustion or thermal decomposition, hazardous products may be produced: .Exposure to combustion or decomposition products may be a hazard to health.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 5.3 | <b>ADVICE FOR FIREFIGHTERS:</b><br><u>Special protective equipment:</u><br>Depending on magnitude of fire, heat-proof protective clothing may be required, appropriate independent breathing apparatus, gloves, protective glasses or face masks and boots. If the fire-proof protective equipment is not available or is not being used, combat fire from a sheltered position or from a safe distance. The standard EN469 provides a basic level of protection for chemical incidents.<br><u>Other recommendations:</u><br>Cool with water the tanks, cisterns or containers close to sources of heat or fire. Bear in mind the direction of the wind. Do not allow fire-fighting residue to enter drains, sewers or water courses. |

DANOCRET PROTECT 300 FLEX BLANCO

## SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 PERSONAL PRECAUTIONS, PROTECTIVE EQUIPMENT AND EMERGENCY PROCEDURES:

# Avoid direct contact with this product.

6.2 ENVIRONMENTAL PRECAUTIONS:

Avoid contamination of drains, surface or subterranean water and soil. In the case of large scale spills or when the product contaminates lakes, rivers or sewages, inform the appropriate authorities in accordance with local regulations.

6.3 METHODS AND MATERIAL FOR CONTAINMENT AND CLEANING UP:

Sweep spilt product. Keep the remains in a closed container.

6.4 REFERENCE TO OTHER SECTIONS:

For contact information in case of emergency, see section 1.  
 For information on safe handling, see section 7.  
 For exposure controls and personal protection measures, see section 8.  
 For waste disposal, follow the recommendations in section 13.

## SECTION 7: HANDLING AND STORAGE

7.1 PRECAUTIONS FOR SAFE HANDLING:

Comply with the existing legislation on health and safety at work.

- General recommendations:

Avoid any type of leakage or escape. Keep the container tightly closed.

- Recommendations for the prevention of fire and explosion risks:

The product is not liable to ignite, deflagrate or explode, and does not sustain the combustion reaction by oxygen from air in the environment in which it is, so it is not included in the scope of Directive 2014/34/EU concerning equipment and protective systems intended for use in potentially explosive atmospheres.

- Recommendations for the prevention of toxicological risks:

Do not eat, drink or smoke while handling. After handling, wash hands with soap and water. For exposure controls and personal protection measures, see section 8.

- Recommendations for the prevention of environmental contamination:

It is not considered a danger to the environment. In the case of accidental spillage, follow the instructions indicated in section 6.

7.2 CONDITIONS FOR SAFE STORAGE, INCLUDING ANY INCOMPATIBILITIES:

Forbid the entry to unauthorized persons. Keep out of reach of children. Keep away from sources of heat. If possible, avoid direct contact with sunlight. Avoid extreme humidity conditions. In order to avoid leakages, the containers, after use, should be closed carefully and placed in a vertical position. For more information, see section 10.

- Class of store:

According to current legislation.

- Maximum storage period:

12 Months.

- Temperature interval:

min:5 °C, max:30 °C (recommended).

- Incompatible materials:

Keep away from acids.

- Type of packaging:

According to current legislation.

- Limit quantity (Seveso III): Directive 2012/18/EU:

Not applicable (product for non industrial use).

7.3 SPECIFIC END USE(S):

For the use of this product particular recommendations apart from that already indicated are not available.

## SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

## 8.1 CONTROL PARAMETERS:

If a product contains ingredients with exposure limits, may be necessary a personnel monitoring, work place or biological, to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to EN689, EN14042 and EN482 standard concerning methods for assessing the exposure by inhalation to chemical agents, and exposure to chemical and biological agents. Reference should be also made to national guidance documents for methods for the determination of dangerous substances.

- OCCUPATIONAL EXPOSURE LIMIT VALUES (WEL)

| EH40/2005 WELs (United Kingdom) 2018 | Year | WEL-TWA | mg/m <sup>3</sup> | WEL-STEL | mg/m <sup>3</sup> | Remarks                 |
|--------------------------------------|------|---------|-------------------|----------|-------------------|-------------------------|
| Cement portland                      | 2010 | -       | 1                 | -        | -                 | A4, Breathable fraction |

WEL - Workplace Exposure Limit, TWA - Time Weighted Average (8 hours), STEL - Short Term Exposure Limit (15 min).

A4 - Non classified as carcinogenic in humans.

- BIOLOGICAL LIMIT VALUES:

Biological monitoring can be a very useful complementary technique to air monitoring when air sampling techniques alone may not give a reliable indication of exposure. Biological monitoring is the measurement and assessment of hazardous substances or their metabolites in tissues, secretions, excreta or expired air, or any combination of these, in exposed workers. Measurements reflect absorption of a substance by all routes. Biological monitoring may be particularly useful in circumstances where there is likely to be significant skin absorption and/or gastrointestinal tract uptake following ingestion, where control of exposure depends on respiratory protective equipment, where there is a reasonably well-defined relationship between biological monitoring and effect, or where it gives information on accumulated dose and target organ body burden which is related to toxicity.

This preparation contains the following substances that have established a biological limit value:

- DERIVED NO-EFFECT LEVEL (DNEL):

Derived no-effect level (DNEL) is a level of exposure that is considered safe, derived from toxicity data according to specific guidances included in REACH. DNEL values may differ from a occupational exposure limit (OEL) for the same chemical. OEL values may come recommended by a particular company, a government regulatory agency or an organization of experts. Although considered protective of health, the OEL values are derived by a process different of REACH.

CORROSION / IRRITATION / SENSITISATION :

| Danger class                                          | Target organs | Cat.  | Main effects, acute and/or delayed                                                                                                  | Criteria                   |
|-------------------------------------------------------|---------------|-------|-------------------------------------------------------------------------------------------------------------------------------------|----------------------------|
| - Respiratory corrosion/irritation:<br>Not classified | -             | -     | Not classified as a product corrosive or irritant by inhalation (based on available data, the classification criteria are not met). | GHS/CLP 1.2.6.<br>3.8.3.4. |
| - Skin corrosion/irritation:<br>                      | Skin<br>      | Cat.2 | IRRITANT: Causes skin irritation.                                                                                                   | GHS/CLP 3.2.3.3.           |
| - Serious eye damage/irritation:<br>                  | Eyes<br>      | Cat.1 | DAMAGE: Causes serious eye damage.                                                                                                  | GHS/CLP 3.3.3.3.           |
| - Respiratory sensitisation:<br>Not classified        | -             | -     | Not classified as a product sensitising by inhalation (based on available data, the classification criteria are not met).           | GHS/CLP 3.4.3.3.           |
| - Skin sensitisation:<br>                             | Skin<br>      | Cat.1 | SENSITISING: May cause an allergic skin reaction.                                                                                   | GHS/CLP 3.4.3.3.           |

GHS/CLP 3.2.3.3: Classification of the mixture when data are available for all components or only for some components.

GHS/CLP 3.3.3.3: Classification of the mixture when data are available for all components or only for some components.

GHS/CLP 3.4.3.3: Classification of the mixture when data are available for all components or only for some components.

GHS/CLP 3.8.3.4: Classification of the mixture when data are available for all components or only for some components.

- ASPIRATION HAZARD:

| Danger class                           | Target organs | Cat. | Main effects, acute and/or delayed | Criteria          |
|----------------------------------------|---------------|------|------------------------------------|-------------------|
| - Aspiration hazard:<br>Not classified | -             | -    | Not applicable (solid).            | GHS/CLP 3.10.3.3. |

GHS/CLP 3.10.3.3: Classification of the mixture when data are available for all components or only for some components.

SPECIFIC TARGET ORGANS TOXICITY (STOT): Single exposure (SE) and/or Repeated exposure (RE):

Not classified as a dangerous product for target organs.

GHS/CLP 3.8.3.4: Classification of the mixture when data are available for all components or only for some components.

CMR EFFECTS:- Carcinogenic effects:

It is not considered as a carcinogenic product.

- Genotoxicity:

It is not considered as a mutagenic product.

- Toxicity for reproduction:

Does not harm fertility. Does not harm the unborn child.

- Effects via lactation:

Not classified as a hazardous product for children breast-fed.

DELAYED AND IMMEDIATE EFFECTS AS WELL AS CHRONIC EFFECTS FROM SHORT AND LONG-TERM EXPOSURE:Routes of exposure

May be absorbed by inhalation of dust.

- Short-term exposure:

# Causes skin irritation. Causes serious eye damage.

- Long-term or repeated exposure:

Not available.

INTERACTIVE EFFECTS:

Not available.

INFORMATION ABOUT TOXICOCINETICS, METABOLISM AND DISTRIBUTION:- Dermal absorption:

Not available.

- Basic toxicokinetics:

Not available.

ADDITIONAL INFORMATION:

Some people may develop eczema by exposure to dust from wet cement, caused either by high pH which causes dermatitis irritation after prolonged contact,

11.2 INFORMATION ON OTHER HAZARDS:Endocrine disrupting properties:

DANOCRET PROTECT 300 FLEX BLANCO

Version: 2

Revision: 10/04/2025

Previous revision: 09/06/2023

Date of printing: 10/04/2025

This product does not contain substances with endocrine disrupting properties identified or under evaluation.

Other information:

No additional information available.

**SECTION 12: ECOLOGICAL INFORMATION**

# No experimental ecotoxicological data on the preparation as such is available. The ecotoxicological classification for these mixture has been carried out by using the conventional calculation method of the Regulation (EU) No. 1272/2008~2022/692 (CLP).

**12.1 TOXICITY:**

- Acute toxicity in aquatic environment for individual ingredients

CL50 (OECD 203)  
mg/l-96hours

CE50 (OECD 202)  
mg/l-48hours

CE50 (OECD 201)  
mg/l-72hours

Flue dust (portland cement)

11 - Fishes

100 - Daphniae

28 - Algae

- No observed effect concentration

Not available

- Lowest observed effect concentration

Not available

ASSESSMENT OF AQUATIC TOXICITY:

| Aquatic toxicity                            | Cat. | Main hazards to the aquatic environment                                                                                                                                   | Criteria                |
|---------------------------------------------|------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|
| - Acute aquatic toxicity:<br>Not classified | -    | Not classified as a hazardous product with acute toxicity to aquatic life (based on available data, the classification criteria are not met).                             | GHS/CLP<br>4.1.3.5.5.3. |
| - Chronic aquatic toxicity:                 | -    | Not classified as a dangerous product with chronic toxicity to aquatic life with long lasting effects (based on available data, the classification criteria are not met). | GHS/CLP<br>4.1.3.5.5.4. |

CLP 4.1.3.5.5.3: Classification of a mixture for acute hazards, based on summation of classified components.

CLP 4.1.3.5.5.4: Classification of a mixture for chronic (long term) hazards, based on summation of classified components.

**12.2 PERSISTENCE AND DEGRADABILITY:**- Biodegradability:

Not available.

- Hydrolysis:

Not available.

- Photodegradability:

Not available.

**12.3 BIOACCUMULATIVE POTENTIAL:**

Not available.

| Bioaccumulation for individual ingredients | logPow | BCF<br>L/kg | Potential         |
|--------------------------------------------|--------|-------------|-------------------|
| Flue dust (portland cement)                |        |             | No bioaccumulable |
| Cement portland                            |        |             | Not available     |

**12.4 MOBILITY IN SOIL:**

Not available

**12.5 RESULTS OF PBT AND VPVB ASSESMENT:(Annex XIII of Regulation (EC) no. 1907/2006:)**

Does not contain substances that fulfil the PBT/vPvB criteria.

**12.6 ENDOCRINE DISRUPTING PROPERTIES:**

This product does not contain substances with endocrine disrupting properties identified or under evaluation.

**12.7 OTHER ADVERSE EFFECTS:**- Ozone depletion potential:

Not available.

- Photochemical ozone creation potential:

Not available.

- Earth global warming potential:

Not available.

|                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                     |          |             |               |  |  |           |

DANOCRET PROTECT 300 FLEX BLANCO

Version: 2

Revision: 10/04/2025

Previous revision: 09/06/2023

Date of printing: 10/04/2025

## SECTION 16 : OTHER INFORMATION

16.1 TEXT OF THE PHRASES AND NOTES REFERENCED IN SECTIONS 2 AND/OR 3:

Hazard statements according the Regulation (EU) No. 1272/2008~2022/692 (CLP), Annex III:

H315 Causes skin irritation. H317 May cause an allergic skin reaction. H318 Causes serious eye damage. H335 May cause respiratory irritation.

EVALUATION OF THE INFORMATION ON THE DANGER OF MIXTURES:

See sections 9.1, 11.1 and 12.1.

ADVICES ON ANY TRAINING APPROPRIATE FOR WORKERS:

It is recommended for all staff that will handle this product to carry out a basic training in occupational risk and prevention, in order to provide understanding and interpretation of Safety Data Sheets and labelling of products as well.

MAIN LITERATURE REFERENCES AND SOURCES FOR DATA:

- European Chemicals Agency: ECHA, <http://echa.europa.eu/>
- Access to European Union Law, <http://eur-lex.europa.eu/>
- Threshold Limit Values, (AGCIH, 2021).
- European agreement on the international carriage of dangerous goods by road, (ADR 2025).
- International Maritime Dangerous Goods Code IMDG including Amendment 41-22 (IMO, 2022).

ABBREVIATIONS AND ACRONYMS:

List of abbreviations and acronyms that can be used (but not necessarily used) in this Safety Data Sheet:

- REACH: Regulation concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals.
- GHS: Globally Harmonized System of Classification and Labelling of Chemicals of the United Nations.
- CLP: European regulation on Classification, Labelling and Packaging of substances and chemical mixtures.
- EINECS: European Inventory of Existing Commercial Chemical Substances.
- ELINCS: European List of Notified Chemical Substances.
- CAS: Chemical Abstracts Service (Division of the American Chemical Society).
- UVCB: Substances of Unknown or Variable composition, complex reaction products or biological materials.
- SVHC: Substances of Very High Concern.
- PBT: Persistent, bioaccumulable and toxic substances.
- vPvB: Very persistent and very bioaccumulable substances.
- DNEL: Derived No-Effect Level (REACH).
- PNEC: Predicted No-Effect Concentration (REACH).
- LC50: Lethal concentration, 50 percent.
- LD50: Lethal dose, 50 percent.
- UN: United Nations Organisation.
- ADR: European agreement concerning the international carriage of dangerous goods by road.
- RID: Regulations concerning the international transport of dangerous goods by rail.
- IMDG: International Maritime code for Dangerous Goods.
- IATA: International Air Transport Association.
- ICAO: International Civil Aviation Organization.

SAFETY DATA SHEET REGULATIONS:

Safety Data Sheet in accordance with Article 31 of Regulation (EC) No. 1907/2006 (REACH) and Annex of Regulation (EU) No. 2020/878.

HISTORIC: REVISION:

Version: 1 09/06/2023

Version: 2 10/04/2025

Changes since previous Safety Data Sheet:

Legislative, contextual, numerical, methodological and normative changes since the previous version of the present Safety Data Sheet are identified by #.

The information of this Safety Data Sheet, is based on the present state of knowledge and on current UE and national laws, as the users' working conditions are beyond our knowledge and control. The product is not to be used for other purposes than those specified, without first obtaining written handling instruction. It is always the responsibility of the user to take all necessary steps in order to fulfil the demand laid down in the local rules and legislation. The information in this Safety Data Sheet is meant as a description of the safety requirements of the product and it is not to be considered as a guarantee of the product's properties.

Safety Data Sheet (SDS) generated with the 6.0.0.188 version of the JMTCHEM software ([www.jmtchemsolutions.com](http://www.jmtchemsolutions.com)).
