

DRY URINAL CLEANING GUIDE

DAILY CLEANING

STEP 1

Wash the urinal with any environmentally friendly liquid soap.

STEP 2

Use a soft fiber or sponge to scrub.

STEP 3

Rinse thoroughly with water.

OST ELEMENT CLEANING (RECOMMENDED EVERY 8 DAYS)

STEP 1

Remove the grate and the OST Element (you can do it with needle-nose pliers).

STEP 2

Clean the grate and the OST Element and rinse them with plenty of water.

STEP 3

Check that there are no particles left on the grate or on the OST Element that could obstruct its proper functioning.

STEP 4

Place the grate and the OST Element back in place.

STEP 5

If your urinal has a stainless steel or ceramic grate, first place the OST Element in the grate and then place them in the urinal.

DRAIN CLEANING (RECOMMENDED EVERY 6 MONTHS)

Clean the drain up to 2 meters and thus keep your flush system in optimal condition.

RECOMMENDED TOOLS

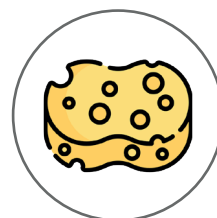

Needle-nose pliers

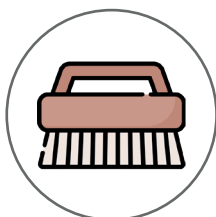

Cleaning liquid

Gloves

Fiber or sponge

Soft bristle
brush

Soft cloth

Bucket or
container
