NEW

ComfortGEL®

Gel coated handles for maximum comfort, control and best results.

ADJUSTABLE CULTIVATOR HML1000

ComfortGEL®

- ✓ Cultivates and aerates previously loosened soil.
- ✓ Removes weeds.
- ✓ Maintains plant rows and encourages plant growth.
- ✓ Hardened and treated tines for longer tool life.
- ✓ Metal support and foot rest.
- ✓ Steel handle for strength and rigidity.

Instructions for use: three tine configurations depending on the task:

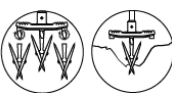

n1

Remove weeds between rows or cultivate before planting.

n2

Loosen the side bolts to remove the tines and grow new rows of plants.

n3

Loosen middle bolt and remove tines to cultivate the soil around the plants.

HAND ROTOTILLER HML1001

ComfortGEL®

- ✓ Decompacts and aerates soil before planting.
- ✓ Hardened steel tines for breaking up compacted soil.
- ✓ T-shape for comfortable and easy handling.
- ✓ Steel handle for strength and rigidity.
- ✓ All-steel footrest with non-slip traction grooves for greater control.

Instructions for use

n1

Place your foot on the base. Step firmly and insert the tines into the soil.

n2

Turn the T-handles half a turn to loosen and decompact the soil.

n3

Use the plunger to discharge any mud or dirt.

WEED REMOVER HML1002

ComfortGEL®

- ✓ Removes weeds without chemicals and without bending over.
- ✓ Hardened steel tines for breaking up compacted soil.
- ✓ T-shape for comfortable and easy handling.
- ✓ All-steel footrest with non-slip traction grooves for greater control.

Instructions for use

n1

Place the tines directly on the weeds.

n2

Twist the T-handles towards you and lift to remove the weeds, roots and soil.

n3

Pull out the weeds. Fill the grass hole and use the plunger to remove any mud or dirt.
