SET-UP WARNINGS

- **Always disconnect the power supply** before installing or marking modifications to the devices.
- The fitting and handling of these devices must be carried out by **authorised personnel**.
- The wiring must run at least **40cm away from any other wiring**.
- Do not overtighten the screws of the monitor connector.
- Install the monitor in adry protected location free from the risk of dripping or splashing water.
- Do not place in humid, dusty or smoky locations, or near sources of heat.
- Before connecting the device to the mains, check the connections between the door panel, power supply unit, distributors and monitors,
- Use the Golmar **RAP-GTWIN/HF** cable (2x1mm²).
- Always follow the instructions contained in this manual.

CHARACTERISTICS

- Hands-free monitor (also allows communication with a handset).
- 7" TFT colour screen.
- Push buttons/ hidden push buttons for access and selection of menu function.
- Monitor with simple installation (non-polarised 2 wires bus).
- User menu.
- Installer menu.
- Image and communication settings menu.
- Output to auxiliary call repeater (maximum 50mA/12Vdc).
- "HZ" input for calls from apartment front door. **Important:** Up to 6 monitors/ apartments with push button "HZ" activated at the same time (with system and monitors in standby).
- Push button for Door release 1 and hidden push button for Door release 2.
- Notification leds.
- Configuration switches to assign the call address (1 to 128) and end of line.
- Function codes to define whether the monitor is master or slave (default: master).

SYSTEM OPERATION

- To make a call, the visitor must press the button of the apartment; an audible sound indicates that the call is being made and the door panel LED  will turn on. If vocal synthesis is enabled, a 'Call is in progress' message appears indicating that a call is being made. At this moment, the apartment's monitors receive the call. If another apartment is called by mistake, press the button for the correct apartment and the first call will be cancelled.
- Upon receiving the call, the image will appear on the screen of the master monitor (and slave 1, if it exists) without the visitor knowing and icon  displayed on the screen (green color). To view the image from slave monitors 2 or 3, press the one of the buttons (located above the raised dots for the visually impaired) of the monitor to display the image. If the call is not answered within 45 seconds, the door panel LED  will turn off and the system will become free.
- To establish communication, press the push button below off-the-hook icon  shown on the screen or (you can also lift the handset). Door panel LED  will turn off and the led  will turn on.
- Connection will last for 90 seconds or until the push button below on-the-hook icon  shown on the screen is pressed or (hang up the handset only if communication has been established by lifting the handset). When communication ends, door panel LED  will turn off and the system will become free. If vocal synthesis is enabled, a 'Communication is finished' message will indicate that the call is over.
- To open door  or  of the door panel, press the push button below of icon  displayed on the screen or press the hidden push button below of icon  displayed on the screen during the call or communication processes: one press will activate the lock release for 3 seconds and the door panel LED  will also turn on for 3 seconds. If vocal synthesis is enabled, a 'Door is open' message will be indicated on the door panel.
- Detailed operation of the monitor is described on pp. 6-27.

DESCRIPTION

A. Handset.

B. Notification icons:

- ⏻ Power on indicator.
- 🔕 Do not disturb.
- 🔌 Auxiliary relay activated.
- 🚪 Door opening.
- 📷 New image/video.

C. Hidden button indicator LEDs* :

To access the main menu (monitor in standby), press either of the 2 buttons / located above the raised dots for the visually impaired (see p. 6).

In call/ communication: press button to start or end the communication.

In call/ communication: one press will activate the lock release for 3 seconds.

In call/communication: an LED shows the location of each of the hidden buttons.

The function of each hidden button is shown on the monitor screen with an icon located just above each button (see pp. 6-27).

D. Raised dots for the visually impaired.

In standby:

Above the raised dots for the visually impaired ●/●● are the buttons that access the main menu.

In call:

● Above this raised dot is the 'Start/end communication' button .

●● Above this raised dot is the 'Door opening' button .

E. Cable slot.

F. Speaker (hands-free communication mode).

G. 7" TFT colour screen.

H. Micro SD card slot (not included).

Type: MicroSD Class 10 from 4GB to 128GB.

I. Microphone (hands-free communication mode).

J. Wall mounting connector fixing (x4).

K. Configuration switches.

L. Installation terminals.

M. Speaker (communication with "handset").

N. Microphone (communication with "handset").

INSTALLATION

- Avoid dusty or smoky environments or locations near sources of heat.
For proper installation, use the template supplied with the product.
1. Position the top of the template at a height of 1.65m.
 2. If you are going to use an embedding box to pass the wiring through, make sure that it is in line with the holes corresponding to the box model chosen and fix the connector. If you prefer to fix the connector directly to the wall, make four 6mm holes at the points indicated (A), insert the wall plugs supplied and screw in the connector.
 3. Pass the installation wires through the middle hole and connect them to the removable terminals as shown in the wiring diagrams. Before connecting the removable terminals to the monitor, configure the switch as indicated below.
 4. Connect the removable terminals to the monitor and place the monitor in front of the connector, making sure the fixings line up. Move the monitor downwards to secure it.

INSTALLATION TERMINALS (L)

For ease of installation, the installation terminals are removable and supplied in a separate bag. Once the terminals are wired, place them in position.

BUS IN: Communication bus input to monitor (non-polarised).
BUS OUT: Communication bus output to additional monitor (non-polarised).
SA, GND: Auxiliary call repeater output (max 50mA/12V), relay SAR-12/24.
HZ, HZ: Apartment front door button input:
Connect only on the master monitor. The signal received is then transmitted to the slave monitors in the same apartment through the BUS.

Note: HZ push button function mode: When HZ push button is pressed will be call tone and activate the output of auxiliary call repeater with standby monitor, call process, communication process (HZ tone with lower audio level), intercom process and "Do not disturb" mode. **Important:** Up to 6 monitors/ apartments with push button "HZ" activated at the same time (with system and monitors in standby).

CONFIGURATION SWITCHES (K)

Building / Villa (Nexa Door Panel)

Switches 1 to 7: Sets the monitor address (addresses 1 to 128).
The switches set to OFF have a zero value. The values of the switches set to ON are shown in the table below. The monitor code is the sum of the values of the switches set to ON.

Important: Apartment 1 (Dip1 to ON & Dip2-Dip7 to OFF).
Important: Apartment 128 (Dip1 - Dip7 to OFF).

Table of values

Switch number:	1	2	3	4	5	6	7
Value when ON:	1	2	4	8	16	32	64

Example: 0+0+4+0+16+0+0= 20

Switch 8: This activates the end-of-line resistance in the ON position. Activate it in monitors where the bus cable ends. Deactivate it only in intermediate monitors.

To define whether the monitor is master or slave:
To define whether the monitor is master or slave (see special codes on pages 28 to 32). Each apartment must have one master monitor, and only one.

MAIN MENU

If the device is in standby (screen switched off), to access the main menu, press either of the 2 buttons / (located above the raised dots ● / ●● for the visually impaired) on the monitor. Then press the hidden button located just below the corresponding icon. The device will return to standby mode after 20 seconds without activity.

Press the button below icon to access the menu of the intercom between other monitors in the same apartment or other apartments (see pp. 19-21).

Press the button below icon to display the image from the door panels and cameras connected to the system. Note: This enables the door panel camera to be changed, the audio on the corresponding door panel to be activated and the door to be opened (see p. 15).

Press the hidden button below icon to "stairs light" activation (SAR-G2+ & SAR-12/24 modules required).

Press the hidden button below icon to display the list of images recorded in the memory of the device. If a MicroSD card is inserted in the monitor, images/videos will be recorded on the MicroSD card (see pp. 22-24).

There are no images/videos pending viewing.

There are images/videos pending viewing.

Indicates that the inserted Micro SD card must be formatted from the monitor. Access this function by pressing the hidden button below icon to access the Micro SD card format menu, then press the hidden button below icon to start formatting the Micro SD card. To return to the main menu, press the button/ hidden button below corresponding icons / . To exit without formatting, press the button below icon .

Press the hidden button below icon for 3 seconds to enable and for 1 second to disable the 'Do not disturb' function: If the monitor is in 'Do not disturb' mode, the ringtone on the monitor does not sound when a call is received (see note "HZ" in page 5) and the notification icon will illuminate.

With the "Do not disturb" mode deactivated, a one-second press accesses the menu, allowing you to set a "Do not disturb" mode time period (see pages 25 to 27), activate/deactivate the intercom between apartments (see page 26) and set an "Automatic door opening" mode time (see pages 26 to 27).

Press the hidden button below icon to make changes to the system settings (see pp. 7-14).

SETTINGS MENU

If the device is in standby (screen switched off), to access the main menu, press either of the 2 buttons / (located above the raised dots ●/●● for the visually impaired) on the monitor. Then press the hidden button located just below the icon to access to the “access settings menu screen”, see page 6.

Access settings menu screen

(*) **Note:** Icon to intercom menu will be placed in “Access settings menu screen”, if there is a guard monitor or guard unit in the building, see page 6.

Returning to the main menu: Press the button below icon to return to the main menu.

To access the settings menu screen:

Press the button below icon to access the settings screen menu.

SETTINGS MENU

Automatically deleting images/videos, image recording mode, internal memory and Micro SD card: Press the hidden button below icon  to access the settings screen.

Settings menu screen

In some countries, the law does not permit the storage of images or videos for more than 30 days after recording. The automatic deletion function performs this task for you. You can disable this function if your country's legislation does not require it, or under your responsibility.

If you have not inserted a Micro SD card into your monitor, only still images can be recorded in the internal memory of the monitor (up to 100). If you have inserted one, the images and videos will always be recorded on the card, and the images in the internal memory cannot be displayed until you copy them to the card.

From this menu, you can select the image recording mode, delete contents, copy from the internal memory to the Micro SD card and format the card. Any of these actions (copy/delete) will require confirmation.

Press the button below icon  to return to the settings menu.

Screen select option

Main menu

DOOR PANEL CALL SCREEN

This screen is displayed when you receive a call or when you press the button below icon  of the main menu. During a call, icon  displayed on the screen green color (during the call process). In the top centre of the screen, the date and time are shown and, on the left, the source of the image is displayed (door panel 1 to door panel 4, camera 1 to camera 4). The call has a duration of 45 seconds.

Only if you have pressed the hidden button below the icon  in the main menu (see page 6), the icon  will appear on the screen, to end the current display and return to the main menu.

Press the button below icon  for 3 seconds to access the image settings menu during the call process. Select the option to be modified by pressing the hidden button/button below corresponding icons  / , change to the desired level by pressing the buttons below corresponding icons  /  and validate the changes made by pressing the button below icon , (see pages 17 to 18).

Press the hidden button below icon  to change the source of the image as long as the system has more than one door panel or has an external camera connected and display has been activated (see pp. 28-31). It is possible to make the change during display, call and communication processes.

Press the button below icon  to start audio communication with the door panel displayed or (you can also lift the handset).

Press the button below icon  to activate the lock release (or device connected to the CV output of the door panel) for 3 seconds (factory setting, programmable by the installer; see pp. 28-31). During activation, indicator  will illuminate.

Press the hidden button below icon  to activate the lock release (or device connected to the relay output of the door panel) for 3 seconds (factory setting, programmable by the installer; see pp. 28-31). During activation, indicator  will illuminate.

A few seconds after receiving a call, it automatically takes a photograph. In the top right of the screen, icon  is displayed and indicator  will illuminate. Press the hidden button below icon  to take a picture.

If a Micro SD card is inserted, a 15-second video automatically starts recording a few seconds after receiving the call. In the top right of the screen, icon  is displayed and indicator  will illuminate (see p. 10 to configure video recording mode). Then a short 1-second press on the hidden button below icon  will take a photograph or a long 3-second press will record a video.

Press the hidden button below icon  to end the call tone on the monitor.

COMMUNICATION SCREEN

This screen is displayed during communication process. icon displayed on the screen red color (during the communication process), in the top centre of the screen, the date and time are shown and, on the left, the source of the image is displayed (door panel 1 to door panel 4, camera 1 to camera 4).

Press the hidden button below icon during 3 seconds to access the image and monitor in communication volume settings menu. Go to the option to be modified by pressing the button/ hidden button below corresponding icons / , change to the desired level by pressing the hidden buttons below corresponding icons / and validate the changes made by pressing the button below icon , (see p. 17 to 18).

Press the hidden button below icon to change the source of the image as long as the system has more than one door panel or has an external camera connected and display has been activated (see pp. 28-31). It is possible to make the change during display, call and communication processes.

Press the button below icon to start audio communication with the door panel displayed or (hang up the handset only if communication has been established by lifting the handset). Communication has a maximum duration of 90 seconds. Once communication has ended, the screen will turn off.

Press the button below icon to activate the lock release (or device connected to the CV output of the door panel) for 3 seconds (factory setting, programmable by the installer; see pp. 28-31). During activation, indicator will illuminate.

Press the hidden button below icon to activate the lock release (or device connected to the relay output of the door panel) for 3 seconds (factory setting, programmable by the installer; see pp. 28-31). During activation, indicator will illuminate.

A few seconds after receiving a call, it automatically takes a photograph. In the top right of the screen, icon is displayed and indicator will illuminate. Press the hidden button below icon to take a picture.

If a Micro SD card is inserted, a 15-second video automatically starts recording a few seconds after receiving the call. In the top right of the screen, icon is displayed and indicator will illuminate (see p. 10 to configure video recording mode). Then a short 1-second press on the hidden button below icon will take a photograph or a long 3-second press will record a video.

In communication, press the button below icon to "staircase light" activation (SAR-G2+ & SAR-12/24 modules required).

SPECIAL CODES**(*) LED lights for night viewing (Door panel 2) during a call or communication process. (Configure only on the master monitor).**

<u>Automatic</u>	<u>Always ON</u>	<u>Always OFF</u>	<u>Factory setting</u>
1450	1451	1452	1450 (automatic).

(*) Activation times of the outputs (Door panel 2). (Configure only on the master monitor).

		<u>Factory setting</u>
Relay 1	From 1200 (0,5s) to 1219 (10s)	1205 (3s)
Relay 2	From 1300 (0,5s) to 1319 (10s)	1305 (3s)

(*) Configuration of the remote activation button Relay1 (Door panel 2). (Configure only on the master monitor).

		<u>Factory setting</u>
Delay	From 1400 (0,5s) to 1419 (10s)	1403 (2s)

(*) Configuration of the remote activation button Relay2 (Door panel 2). (Configure only on the master monitor).

		<u>Factory setting</u>
Delay	From 1500 (0,5s) to 1519 (10s)	1503 (2s)

(*) LED lights for night viewing (Door panel 3) during a call or communication process. (Configure only on the master monitor).

<u>Automatic</u>	<u>Always ON</u>	<u>Always OFF</u>	<u>Factory setting</u>
2450	2451	2452	2450 (automatic).

(*) Activation times of the outputs (Door panel 3). (Configure only on the master monitor).

		<u>Factory setting</u>
Relay 1	From 2200 (0,5s) to 2219 (10s)	2205 (3s)
Relay 2	From 2300 (0,5s) to 2319 (10s)	2305 (3s)

(*) Configuration of the remote activation button Relay1 (Door panel 3). (Configure only on the master monitor).

		<u>Factory setting</u>
Delay	From 2400 (0,5s) to 2419 (10s)	2403 (2s)

(*) Configuration of the remote activation button Relay2 (Door panel 3). (Configure only on the master monitor).

		<u>Factory setting</u>
Delay	From 2500 (0,5s) to 2519 (10s)	2503 (2s)

(*) LED lights for night viewing (Door panel 4) during a call or communication process. (Configure only on the master monitor).

<u>Automatic</u>	<u>Always ON</u>	<u>Always OFF</u>	<u>Factory setting</u>
3450	3451	3452	3450 (automatic).

(*) Activation times of the outputs (Door panel 4). (Configure only on the master monitor).

		<u>Factory setting</u>
Relay 1	From 3200 (0,5s) to 3219 (10s)	3205 (3s)
Relay 2	From 3300 (0,5s) to 3319 (10s)	3305 (3s)

(*) Configuration of the remote activation button Relay1 (Door panel 4). (Configure only on the master monitor).

		<u>Factory setting</u>
Delay	From 3400 (0,5s) to 3419 (10s)	3403 (2s)

(*) Configuration of the remote activation button Relay2 (Door panel 4). (Configure only on the master monitor).

		<u>Factory setting</u>
Delay	From 3500 (0,5s) to 3519 (10s)	3503 (2s)

To define the light up duration time from 1 to 99 seconds (SAR-G2+ Relay). (Configure only on the master monitor).

	<u>Factory setting</u>
From 1801 (1s) to 1899 (99s)	1803 (3s)

To define the light up delay time from 0 to 99 seconds (SAR-G2+ Relay). (Configure only on the master monitor).

	<u>Factory setting</u>
From 1900 (0s) to 1999 (99s)	1900 (0s)

Restore the door panel(s) Soul Access with the master code to factory default: "1234".

<u>All door panels</u>	<u>Door panel 1</u>	<u>Door panel 2</u>	<u>Door panel 3</u>	<u>Door panel 4</u>
8000	8001	8002	8003	8004
