

# ANGLE VALVES AMERICA

They are the most commonly used in hot and cold water installations for sanitary water. They cut off the flow of water to the taps in washbasins, sinks, toilet cisterns and other consumption points, and thus allow their repair or replacement.

NEW DESIGN  
of handle and rosette

- ✓ **Anti-limescale**
- ✓ **1/4" turn** polyacetal shaft closure
- ✓ **Chrome finish**

## TECHNICAL SHEET

UTILITY MODEL

The America valve is sealed to the outside by means of 2 O-rings located on a technical plastic (hostaform) anti-limescale shaft, providing security against leaks and wear. It has a 90° closing system.
