Discover why NEXUS is the best choice

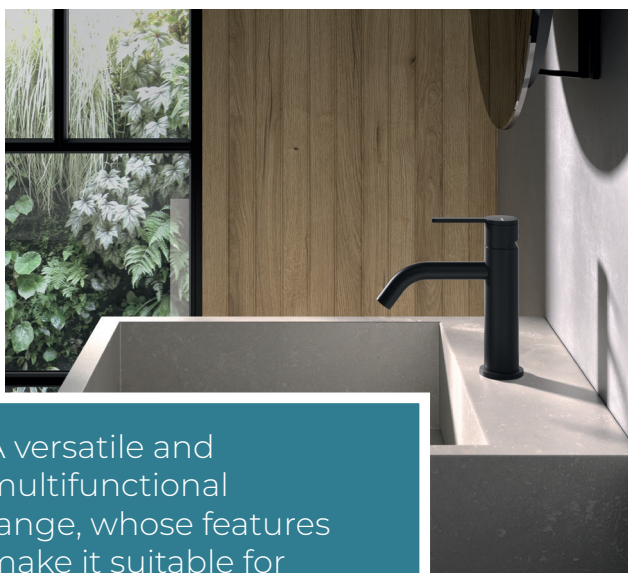

New NEXUS collection in 304 stainless steel

At Clever Taps, we are proud to introduce our **NEXUS** range, a collection of bathroom and kitchen taps crafted from high-quality **304 stainless steel**. This range includes a wide variety of products to meet all bathroom and kitchen needs: basin mixers, tall basin mixers, bidet mixers, concealed basin mixers, bath-shower mixers, showermixers, and concealed shower mixers. Our decision to invest in this range is driven by key factors that reflect our commitment to quality, sustainability, and innovative design.

1.

Design and aesthetics.

Its timeless design is characterized by simple, minimalist and elegant lines, with a cylindrical body and spout that achieve visual harmony, complemented by the contrast of its flat handle. Its design adapts perfectly to any style of bathroom or kitchen. Stainless steel not only provides a sophisticated appearance, but also ensures exceptional durability.

A versatile and multifunctional range, whose features make it suitable for both **renovation** and **refurbishment**, as well as for **new residential projects** with a distinctive touch.

2.

Water savings and certificates

Nexus meets the most demanding certifications on the market, including ACS and UWLA. The UWLA label (The Unified Water Label Association) has been developed by the European bathroom industry to certify the water and energy efficiency of products. By choosing products with this label, we contribute positively to combating climate change and protecting the environment.

3.

Nexus: Where **quality** and **sustainability** meet. Bringing the power of **stainless steel 304** to your home

Stainless steel is a lead-free material with high resistance to corrosion, making it a safe and durable choice for taps. By choosing stainless steel, we ensure that our products are healthy and safe for daily use.

Stainless benefits

Lead Free: Stainless steel is characterised by its lead-free composition, making it safe for use with drinking water.

Durability: It is highly resistant to corrosion and wear, ensuring a long service life.

Higiene: Its smooth, non-porous surface prevents bacterial build-up and facilitates cleaning.

Aesthetics: Provides a modern and elegant finish that remains intact over time.

Sustainability: It is a recyclable material, which contributes to the conservation of the environment.

4.

Ecological finishes:
PVD (Physical vapor
deposition)

The PVD coating technology used in the NEXUS range provides extra resistance to corrosion, extending the lifespan of our products. Additionally, the PVD process is clean and sustainable, aligning with our ecological values and reducing environmental impact.

New **spout design**

A new geometry with balanced lines and a distinctive personality.

CHROME 3 FINISH

CROMO 3 is an ideal surface finish for taps, offering stability, safety, and a low environmental impact.

1

It is highly resistant to corrosion and wear, which guarantees greater durability and an impeccable finish that maintains its shine for longer.

2

It is a safe compound for domestic use, as it does not represent a health risk.

3

Its manufacturing process is more environmentally friendly, contributing to sustainable production.

Choosing taps with Cromo 3 means opting for quality, safety, and environmental responsibility.

Cutting-edge technology for **water** and **energy savings**

The NEXUS range from Clever Taps represents **our commitment to innovation, sustainability, and quality.**

Pull-out 3-way **sink mixer** for water treatment equipment

The 3-way sink mixer features the **Cold Open system**, which allows for significant energy savings. Its operation is simple and intuitive: in its central position, unlike other taps, it does not mix hot and cold water but provides only cold water. To obtain hot or warm water, the handle must be turned to the left.

In addition, it meets the UWLA (The Unified Water Label Association) certification of 8 L/min.

BASIN MIXER 225
