MEASUREMENTS

RECOMMENDATIONS

- Before connecting the water supply, purge the lines to eliminate any impurities that may affect the proper functioning of the product.
- Perform regular cleaning of the aerator to remove trapped particles.

MAINTENANCE

- For cleaning, always use a soft cloth slightly dampened and dry afterwards.
- Do not use cleaning products containing hydrochloric, formic, or acetic acid.
- Do not use sharp objects, abrasive pads, sandpaper, aggressive detergents, solvents, or abrasive powders.
- Do not leave the product without maintenance for extended periods.

TESTS CARRIED OUT
