About us

GRUPO ARGENTA

Born from the shared intrinsic values of four solid and well-established corporations within the industry, Grupo Argenta serves as the unifying link between **Argenta**, **Cifre**, **Azuvi**, and **Zenon** — four leading family-owned manufacturers and distributors of ceramics, originating from the very **heart of the national ceramic industry**.

The Group has united with the purpose of offering stability, trust, and a sense of closeness to its customers, supported by a large multidisciplinary team of more than 1,000 professionals working across all areas of the four companies.

Guided by a shared goal — to speak about ceramics through people, for people, and with people — we provide solutions for the world of architecture, driven by a distinctive vision focused on design and innovation.

ARGENTA

cifre

AZUVI

zenon

Argenta Cerámica embarked on a young and dynamic business journey, driven by the passion to create a **distinctive, people-centred concept** within the world of ceramics.

Since its inception, we have cultivated our own identity, establishing ourselves globally as one of the leading players in today's ceramic industry.

friendlytile

With the **friendlytile** concept, a long-term project was born where we want to share ideas and be closer to you. **Talking about ceramics by working with people and for people**, at a time when brand values become more humanized to give way to a more direct, lively, and authentic communication.

History

In 1981, a young entrepreneur began his business journey in Vila-real in the world of ceramic sales and distribution.

Several years later, in 1999, Argenta Cerámica was established as a global brand with a distinctive concept of ceramics, very close to people, and shortly thereafter industrial operations began (2000).

Argenta began its production journey by initially manufacturing red-body stoneware tiles measuring 45x45 cm, due to the high demand for this product at that time. Gradually, it evolved and adapted to the new market needs, investing in new production technologies.

Argenta offers a complete range of products designed to meet all market needs: from exclusive large-format **ceramic slabs** measuring 120x280 cm with 6 mm thickness, dry-pressed, to elegant **white-body wall tiles available** in multiple rectified sizes such as 60x120, 40x120, 30x90, 30x75, or 30x60, as well as non-rectified formats like 20x75, 20x60, or 20x50.

This offering is complemented by low water absorption **porcelain tiles**, ideal for covering all types of flooring, available in a wide range of sizes—120x120, 90x90, 60x120, 75x75, 37.5x75, 75x150, 20x120, 30x120, 60x60, and 30x60, among others—that combine design, durability, and versatility. All of them are manufactured in-house on production lines specifically designed for this purpose.

Finally, Argenta completes its catalog with **small-format** pieces ranging from the classic 15x15 to more contemporary sizes such as 7.5x30 and 6.5x20.

Historical Timeline

Argenta began its professional activity in **1981** and established its first headquarters in 1999, commencing production a year later. In **2003**, it opened its first major plant in Vall d'Alba (Factory 1), and in **2011** expanded its capacity with Factory 3 in Onda.

The expansion continued with Factory 4 in Villafamés (**2013**) and Factory 2 in Onda (**2018**). In **2020**, logistics were strengthened with the opening of Logistics Center 2, followed by Factory 5 in Vall d'Alba (**2021**).

In **2025**, Argenta reaches a new milestone with the opening of Factory 6 in Onda, consolidating its growth and leadership in the ceramic sector.

ARGENTA

Mision

To develop reliable ceramic products that convey emotion and affection to spaces, providing them with quality, functionality, and aesthetics.

Vision

To be the first choice when seeking to establish commercial or work relationships with a responsible and respectful ceramic producer.

Values

People-oriented

We are committed to our customers, employees, shareholders, suppliers, and the environment. Our vision of a company is one made by people, for people.

We

Mutual benefit

We implement strategic actions that enable us to develop products of the highest quality and offer them at a competitive price, in order to achieve the economic goals and profitability expected from the business. A fair model for all parties involved.

You

To see things from another point of view

Curiosity, constant research, and innovation allow us to see and view ourselves differently; this is reflected in the design of our products, our communication, and our service.

Look

Passion for what we do

We commit with heart and mind to provide solutions every day. We adapt to change, nurture talent, and foster personal, collective, and business growth.

Feel

Our numbers throughout our journey reflect the commitment we have to **innovation, human talent,** and **quality.**

- Glazed Porcelain Stoneware
- White Body Wall Tile (Cladding)

F1. Factory 1

Material type:
Glazed Porcelain Stoneware

Vall d'Alba, Castellón

Argenta's first owned factory was inaugurated in 2003. This factory has been the company's flagship, constantly undergoing changes to adapt to the evolving market needs. Currently, its entire production is porcelain.

F2. Factory 2

Material type:
White Body Wall Tile

Onda, Castellón

It was inaugurated in 2018, joining Argenta's production centers. Currently, it is the main engine for large-format rectified coating.

F3. Factory 3

Material type:
White Paste Coating

Onda, Castellón

It was inaugurated in 2011 in Onda. Its manufacturing type has evolved according to changing market needs, and currently it produces all types of coating, both rectified and non-rectified.

F4. Factory 4

Material type:
Glazed Porcelain Stoneware

Villafamés, Castellón

It was inaugurated in 2013 in Villafamés, with an excellent location since it is very close to Factory 1 and has always provided production support to it. Currently, it is a factory producing porcelain tile, both rectified and non-rectified.

F5. Factory 5

Material type:
Glazed Porcelain Stoneware

Vall d'Alba, Castellón

It was inaugurated in 2021 in Vall d'Alba, a production plant with the latest technology and innovation. It stands out as the first plant able to produce Artech. Currently, it is the production plant for large-format porcelain.

F6. Factory 6

Material type:
Small format

- Glazed Porcelain Stoneware
- White Paste Coating

Onda, Castellón

It joins the production centers in 2025. Factory 6 stands out and is distinguished as the only small-format production plant of all.

Logistics centers

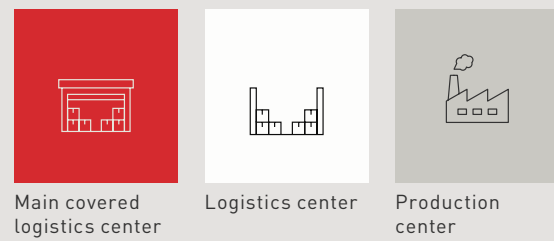

At Argenta, we apply a continuous improvement process to ensure that our materials arrive in optimal conditions, both before shipping and during distribution. Our logistics centers are strategically located to facilitate loading operations and improve loading times.

Furthermore, we continuously invest in infrastructure and technology to optimize the handling and protection of the product, ensuring its safety at every stage of the logistics process.

Logistics / Production Organization

Maximum storage capacity:
18,000,000 m² strategically distributed across the 5 logistics centers.

Showroom Heart

We have a fully experiential and technological space dedicated to the promotion and installation of our ceramic materials, becoming our largest product showcase—more than 2,000 m² of exhibition material available to our clients and visitors.

Product families

Product families

Argenta Cerámica structures its offer into **five product families** designed for different uses and styles. **Artech** stands out for its digital technology that creates surfaces with 3D effects and natural volumes. **Absolut** offers large formats of 120x280 cm and 6 mm thickness for limitless spaces. **Forms** brings together collections in small format with a variety of trendy styles, finishes, and colors. **Max** is technical porcelain at 14 mm, ideal for facades and high-traffic areas. **Extrem**, with 20 mm thickness, is the perfect solution for exterior flooring due to its resistance and installation versatility.

Artech

Since its origins, Argenta has never stopped growing and innovating, and as a result of this philosophy, Artech was born—a new product family developed with the latest existing technology that allows us to **create much more natural models through the use of inks, glazes, and 100% digital effects** that enable the creation of volumes and 3D effects.

ARTECH

Absolut

Absolut is Argenta's **large-format family** — a dream space. A unique, complete, and limitless piece that allows for the design and construction of new places and structures.

Available in **120x280 cm and 6 mm thickness**, it offers boundless inspiration — a collection rich in nuances, textures, and colors, enabling the discovery of multiple functions and sensations.

ABSOLUT
UNLIMITED SLAB

Forms

Forms is a large family in a small format that encompasses different collections and spans various styles. Its geometric variety, the possibilities offered by its different finishes in white body or porcelain, and the wide range of on-trend colors across all collections make it an essential choice for spaces that aim to project a unique style.

forms

Max

Max is the porcelain tile range specially designed for façades and high-traffic flooring, thanks to its 14 mm thickness.

This innovative technical product from Argenta is suitable for all types of projects or renovations, whether in large spaces such as hotels, supermarkets, and stores, or in cladding with ventilated façades, where maximum resistance and durability are required.

MAX

Extrem

The Extrem collection is Argenta's **20 mm thick porcelain stoneware** range. This collection represents the ideal solution for **paving outdoor spaces**, thanks to its anti-slip finish and **high resistance**.

This porcelain stoneware can be installed on various surfaces such as gravel, grass, or sand, and also allows for the creation of raised or floating floors (plots) that can withstand heavy loads and stress.

EXTREM

Trade shows and Events

Trade shows and Events

Argenta strengthens its **international presence** each year by participating in the most important trade fairs in the ceramic sector, such as **Cersaie** in Bologna (Italy) and **Coverings** in the United States. These events are key opportunities to showcase the brand's innovative spirit and connect with professionals from around the world.

Additionally, Argenta hosts its own event, **The Essential Tile Meeting** — an in-house fair that offers a more personal and tailored experience.

The Essential Tile Meeting

Argenta has designed and created The Essential Tile Meeting, an international event where we showcase our latest innovations while offering you personalized attention to make you feel at home. The event takes place in the Heart showroom, located at Argenta's headquarters in Vila-real, Spain).

Trade Fairs – Clients

Argenta Cerámica supports and participates in fairs and events organized by our clients worldwide, bringing our best products to every gathering. These occasions are key opportunities to showcase our latest collections, strengthen business relationships, and share our vision of ceramic design on an international level.

Environmental Responsibility

Environmental Certificates

At Argenta, we are committed to the environment. For this reason, we continuously analyze and optimize **our production process to implement solutions that minimize our environmental footprint**, from manufacturing to the entire lifecycle of our products.

We align ourselves with the leading environmental standards and certifications worldwide.

Integrated Environmental Policy

Sustainable Development (SDGs)

One of our goals is to meet the **Sustainable Development Goals (SDGs)** established by the United Nations (UN). These goals are a set of global objectives aimed at eradicating poverty, protecting the planet, and ensuring prosperity for all as part of a new sustainable development agenda. Each goal has specific targets to be achieved within the next 15 years.

In this regard, Argenta is committed to **environmental** compliance. Because of this commitment, we continuously analyze our production process to incorporate improvements that promote **sustainability** and the protection of our environment, as well as undertake **social actions** to contribute to the development of our workers and community.

Environmental Management System ISO 14001

In 2012, we implemented an **Environmental Management System** in accordance with the requirements established by the international standard **ISO 14001**. This initiative marked a milestone in our commitment to sustainability and environmental protection. Since then, the system has not only remained in place but has continuously evolved, becoming strategically integrated at all levels of our production process.

Sustainability Certification ISO 17.889-1

ISO 17889-1 is an international standard that establishes the requirements for sustainability management systems in the production of ceramic products. This certification assesses the environmental **impact throughout the product life cycle** — from the extraction of raw materials to final disposal — including the stages of production, distribution, and use.

By obtaining this certification, Argenta demonstrates that its processes meet the **highest standards** in terms of **energy efficiency, waste and emissions reduction**, and the responsible use of natural resources. This achievement reflects our commitment to leading the sector toward a more sustainable and responsible future.

Environmental Product Declaration GlobalEPD

The **GLOBAL EPD** (Environmental Product Declaration) certificate is an internationally recognized environmental product declaration that **provides verified and transparent information about the environmental impact of construction materials throughout their entire life cycle**. This certificate is based on international standards and allows for an objective comparison of the environmental performance of different products, offering trust and reliability to designers, specifiers, and professionals in the industry.

Argenta Cerámica holds the GLOBAL EPD certificate for all the products it manufactures, according to their absorption group, ensuring that each of its ceramic solutions has an official, recognized, and globally comparable environmental endorsement. This commitment reaffirms the company's dedication to sustainability, transparency, and responsible innovation in the ceramic sector.

FDES Certificate

The **FDES** certificate (Fiche de Déclaration Environnementale et Sanitaire) is an internationally recognized environmental and health declaration that **provides transparent and verified information about the environmental impact of construction products throughout their entire life cycle**. This certificate enables architects, designers, and builders to make more sustainable and responsible decisions, ensuring traceability and reliability of environmental data.

Argenta Cerámica has obtained the FDES certificate for all its production plants, reaffirming its commitment to sustainability, innovation, and transparency at every stage of its manufacturing process. This achievement demonstrates that all its products carry an official endorsement that certifies their environmental responsibility and alignment with international sustainable building standards.

Environmental Certification System

In this field of action, supporting market demand, the need for buildings to be more efficient, and the value of built assets in the future (which includes resources, energy, sustainability, circular economy, etc.).

Argenta offers solutions to help **reduce environmental impacts** from construction through to the use and final demolition of the building, by means of the three main environmental certification systems worldwide:

- BREAM
- LEED
- VERDE

XS Product Line

The thickness of the ceramic pieces in Argenta's XS product line has been optimized to less than 7 millimeters, while maintaining the same technical and aesthetic performance. This sustainable solution is the result of a strong commitment and effort to preserve the natural environment.

- **Production:** Substantial reduction of CO₂ emissions. 50% decrease in pollutants such as SO₂ (Sulfur).
- **Logistics:** Greater cost efficiency throughout the entire logistics process due to reduced weight and volume, allowing savings of up to 40% in load per trip by transporting more within the same space.
- **Installation:** XS ceramic materials are lighter and easier to handle, allowing for more precise and efficient installation while reducing costs and installation time.
- **Aesthetics:** XS products are available in various formats and types, both in porcelain and wall tiles. These pieces meet the aesthetic needs of architects and interior designers thanks to their flatness, uniformity, and minimalist design.
- **Technical Features:** Strength, flexibility, and durability — an advanced solution designed to protect and preserve our natural environment.

XS

Water Recovery System

We work with a comprehensive water control and recovery system, which has led us to restructure all our production processes with the goal of reusing water across all our factories, preventing waste and repurposing it for other processes.

For this reason, Argenta can certify the following data at its production facilities (provided by the Engineering Department):

→ **100% process water recovery.**

→ **187,946 tons of sludge recovered annually.**

→ Improvement of facilities to **capture airborne dust** and treat it using a wet process.

→ All recovered material is reintroduced into the atomization process, where the **water and sludge mixture is reused.**

Ecological Transition

Our commitment to environmental care and protection, along with continuous improvement in energy efficiency, has enabled us to install large photovoltaic parks at each of our production facilities.

→ 72,000 m² of photovoltaic installations.

→ Reducing electricity consumption by 30%.

→ Also reducing CO₂ emissions by 5,300 tons.

Focused on packaging

At Argenta, we analyze every element of the manufacturing process, and packaging is one that is constantly evolving and improving

All **cardboard fibers** used in ceramic material boxes are **100% recycled and recyclable**. In addition, we have implemented an **innovative pallet return system** with incentives for customers. This process aims to encourage the reuse of the wood and highlight its value. The cost is paid at the time of purchase and refunded upon return at our facilities.

Integrated Environmental Policy and energy transitions

Argenta has implemented an **internal protocol** that ensures **compliance with the objectives and commitments** undertaken regarding the environment.

In our integrated sustainability policy, Argenta has an internal protocol to ensure the achievement of environmental objectives.

At Argenta, we are committed to the environment; therefore, we continuously analyze our production process to implement ongoing improvements.

Quality

ISO 9001. Quality

Since 2016, Argenta Cerámica has held the ISO 9001 Quality certification, an international standard that sets the requirements for an effective quality management system. This certificate, which is audited annually, guarantees that the company implements continuous improvement processes not only in production but also in key departments such as purchasing, marketing, sales, and human resources, among others.

ISO 9001 ensures that all internal procedures are aimed at delivering products and services of the highest quality, reinforcing efficiency, transparency, and customer satisfaction. For Argenta Cerámica, this certification is a fundamental tool that drives innovation, optimizes management, and strengthens the commitment to excellence across all areas of the company.

QB UPEC and QB WallPEC Certification

The QB UPEC and WALL PEC certificates are internationally recognized quality distinctions awarded by the French organization **CSTB**, which **evaluates the performance of ceramic materials under real-use conditions**. These certifications ensure the strength, durability, and reliability of flooring and wall coverings, classifying their performance against wear, penetration, exposure to water, and chemical agents.

Thanks to these certifications, architects, designers, and construction professionals have an objective guarantee that the products meet the highest standards of quality and safety for demanding projects.

Argenta Cerámica holds the QB UPEC and WALL PEC certificates at all its production facilities, confirming the technical excellence of its ceramic solutions and its commitment to offering products with the highest guarantees of reliability, sustainability, and performance in any type of application.

Made in Spain Production

All of Argenta Cerámica's production is carried out entirely in Spain, ensuring thorough control at every stage of the process. In addition, all raw materials used in manufacturing are of European origin, guaranteeing maximum traceability and compliance with the highest standards.

Argenta is strongly committed to local growth and development, working closely with a network of predominantly national suppliers. This model not only strengthens the local economy and employment but also ensures a consistent level of quality and an agile response to the demands of the international market.

As part of TILE OF SPAIN, created by ASCER (Spanish Association of Tile and Ceramic Flooring Manufacturers), Argenta shares the values of excellence, innovation, and sustainability that distinguish Spanish ceramics worldwide.

Argenta maintains a strong commitment to developing social policies that enhance the **well-being of the people** who are part of the company. Through the continuous improvement of its work environments and practices, we promote a culture based on **respect, equity, and professional growth**.

These initiatives are part of a global vision that recognizes human **capital as an essential value** and promotes a healthy, inclusive work environment aligned with the challenges of today and the future.

The main areas of action include:

- Equality, Diversity, and Inclusion Policy.
 - Equality Plan.
 - LGBT+ Plan.
- Harassment Prevention Protocol.
- Ethics Channel.
- Data Protection and Information Security Policy.
- Internal Communication Policy.
- Change Management Policy.
- Annual Continuing Education Plan.
- Digital Disconnection Policy.

Award for Best Practices in People Management

Awarded by the Castellón Human Resources Club

Corporate Social Responsibility

Health and Safety

At Argenta, we consider occupational health and safety as a fundamental pillar of our **corporate culture**. Through Occupational Risk Prevention (**ORP**), we implement policies and measures focused on:

- **Identifying and assessing risks in the various job positions.**
- Implementing **preventive measures** to avoid workplace accidents and occupational illnesses.
- **Training and raising awareness** among staff on safety matters.
- Promoting the proper use of **Personal Protective Equipment (PPE)**.
- Complying with current occupational **health and safety** regulations.
- **Emotional and Social Well-being Initiatives** at Work.

Our commitment to prevention not only protects people, but also aims to promote a more responsible, efficient, and sustainable work environment.

Commitment to Occupational Health and Safety

The health and safety of our people are an essential part of Argenta Cerámica's culture. **Argenta has been evaluated and subjected to the Regulatory Audit provided for in Article 30 of Royal Decree 39/1997, Regulation of Prevention Services, successfully passing it by meeting all the legal requirements established in Law 31/1995 on Occupational Risk Prevention and its implementing regulations.**

This recognition reflects Argenta's strong commitment to **protecting its employees, ensuring safe and healthy work environments that align with the best practices in the industry.** Successfully passing this audit confirms that risk prevention is not only a legal obligation but also a strategic value that drives continuous improvement and the well-being of the entire organization.

Corporate Social Responsibility (CSR)

Corporate Social Responsibility (CSR)

Argenta, in exercising its social responsibility and commitment to local development, health, and the values of teamwork, passion, and effort—of which sports are a prime example—collaborates with the following organizations:

- **Alqueries C.F.** Main collaborator of the local club in the province of Castellón, promoting sports practice, the adoption of healthy lifestyle habits, and a spirit of self-improvement.
- **Club Patí Castalia.** Collaborator of the local roller-skating club in the city of Castellón.

In this context, in 2024, Argenta achieved victory in the **#SummerGames**. This online, sports, and collaborative initiative encouraged employees to earn points through physical activity, thereby promoting a healthy lifestyle within the organization. This initiative was at no cost to the company.

Alqueries CF

Club Patí Castalia

#SummerGames

Corporate Social Responsibility (CSR)

In 2024, the company continued its "Healthy Argenta" program, a set of initiatives aimed at promoting the health and well-being of its employees. The main initiatives include:

- Participation in the traditional Companies' Race organized by the Castellón Chamber of Commerce in the 10K and 5K categories.
- **Fruit Thursdays.** During the month of May, fruit was distributed to staff every Thursday, promoting healthy eating based on seasonal and locally sourced products.
- **Paddle Tennis Tournament.** Organization and execution of an internal competition with different levels of difficulty, promoting physical activity and team integration.
- **Collaboration with the Castellón Blood Transfusion Center.** Organization of two blood donation days, promoting solidarity and social commitment among employees.

Paddle Tennis Tournament

Companies Race

Collaboration with the Castellón Blood Transfusion Center

Corporate Social Responsibility (CSR)

On the other hand, in its commitment to design and art, Argenta has been a collaborator of La Exprimidora (Castellón Designers Association) since 2021, participating in this organization under the category of “**Company that Loves Design**” within a framework of active collaboration.

In 2024, Argenta strengthened this commitment to education by donating tiles to the Guadalajara Education Department, providing materials for the completion of curricular practical activities in the educational field.

Finally, it is important to highlight the great gesture of solidarity and collaboration by Argenta’s employees in response to the recent **DANA in Valencia**. In reaction to this situation, the company organized two major donation collection campaigns:

- **Collection and delivery of school supplies and toys.** In collaboration with CEIP Santa Águeda School in Benicàssim, intended to benefit the community of Algemés, Valencia.

- **Collection and delivery of materials for animal shelters.** In collaboration with the Gats d’Alba association in Vall d’Alba, destined for the Huellas Felinas shelter in Utiel, Valencia.

Through these initiatives, Argenta reaffirms its commitment to social well-being, sustainability, and the development of its community, consolidating its role as a responsible company committed to its environment.

Sponsorships

Argenta continues to invest in its advertising commitment with **Villarreal C.F.** and the **Estadio de la Cerámica**, the team of the city of Vila-real, where the company has its headquarters and showroom.
