# Welcome to Vernacare Clinical Waste Management

## Pioneering a safe and sustainable Clinical Waste Management solution.

Here at Vernacare, we are passionate about clinical waste management and understand the healthcare operations needed to carefully handle, segregate and properly dispose of clinical waste.

Over 40 years ago, we pioneered the first purpose-built sharps container and we continue to innovate. We've introduced the world's first full range of sustainable, single-use clinical waste containers and established the Near Patient Sharps Disposal system for safe disposal of sharps, combating needlestick injuries.

Our clinical waste management portfolio offers a comprehensive range of products to dispose of sharps, pathological waste, pharmaceuticals, and more.

## We are sustainable but never at the compromise of safety.

We're committed to providing safe, sustainable products that not only protect patients and healthcare professionals, but also reduce our impact on the environment.

We are committed to helping you reduce your carbon footprint. Our Sharpsafe® containers have a 94% reduction in their carbon footprint when compared to containers using virgin plastic. Our range combines high-performance sharps waste management with our eco-conscious manufacturing. By switching our manufacturing over to low carbon recycled materials, we are helping to support healthcare facilities to achieve their carbon Net Zero targets.

### Key stats:

Up to 100% recycled material in the base of the containers

94% reduction in carbon footprint compared to virgin containers

Zero waste to landfill utilising high-grade reprocessed material, efficient use of energy and natural resources

Reducing our CO2 emissions through solar panels at our manufacturing site
