WATER BLASTER

HIGH-VOLUME WATER CANNON

KNOCKS OFF HEAVY DIRT FAST

When heavy equipment and vehicles are laden with loads of dirt and mud, water volume is more effective than high pressure for a thorough cleaning.

The Water Blaster delivers up to 25 GPM of water volume — nearly six times more than most pressure washers — along with 500 PSI of pressure to knock off heavy dirt with ease.

The Water Blaster is ideal for pre-wash operations where it automatically draws water from a collection pit, filters it through an inline strainer and sends it back to the Water Blaster for reuse in knocking off caked-on mud.

Typical application of Water Blaster with dual wash bays

DEMUCKING CANNON SERIES

PRE-WASH OPERATIONS

25 GPM and 500 PSI

Removes heavy loads of caked-on mud and dirt

Ideal for pre-wash operations

2 Electrical Configurations

Rugged self-priming, high-pressure diaphragm pump

Footprint: 42" x 59" x 62"

FULL FEATURED DEMUCKING

- Two electrical configurations of an industrial-duty 10 HP motor with on-off motor control for convenience in washing away from the unit
- Rugged self-priming, high-pressure diaphragm pump mounted on vibration isolators
- Liquid level switches to ensure flow of water
- 100' of 3/4-inch abrasive-resistance hose with a variable fan wands and can accommodate a manually operated hose reel (optional)
- Frame made of 2-inch square tubing with an epoxy, powder-coat finish
- Requires flooded suction (above ground tank)

CUSTOMIZE AND ACCESSORIZE

- Accessories enhance the effectiveness of Industrial Wastewater Treatment Systems. Water Maze offers a broad selection of add-ons, accessories, parts, and consumables that support the performance of your water treatment systems.

DETERGENTS, MEDIA AND CONSUMABLES

- Water Maze offers a variety of additives, defoamers and detergents to enhance the effectiveness of water treatment systems. We have a line of quick-release detergents available in 5 and 55 gallons. Filter media such as sand, gravel, and clay, which help provide separation of contaminants in water filtration equipment. We also offer bio-pucks and biostax products for our bioremediation systems, that are designed to alleviate odor in collection pits.

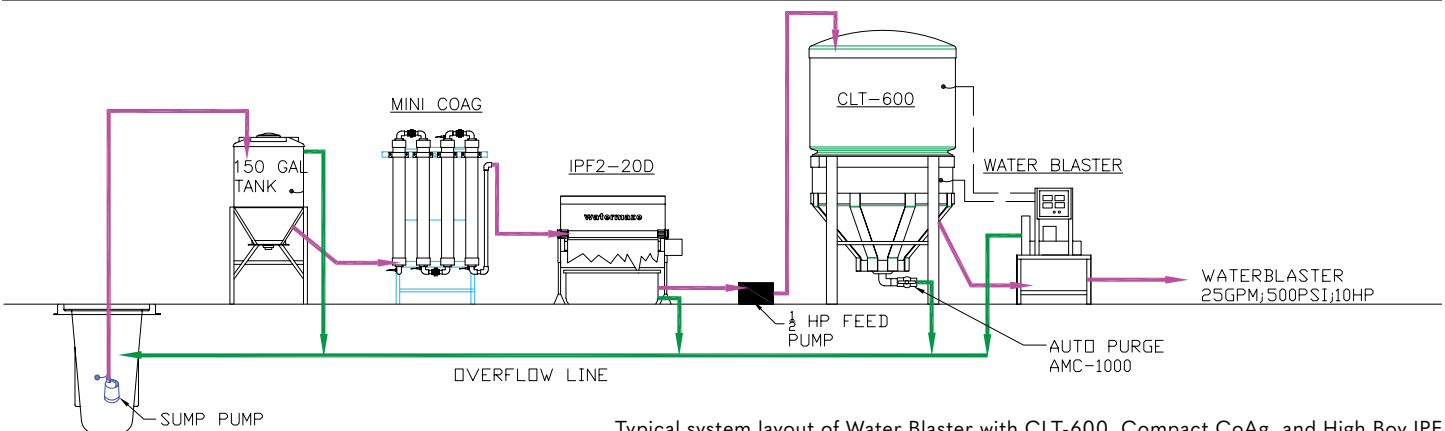

TECHNICAL DATA

MODEL	PART NO.	DESCRIPTION	GPM	PSI	HP	VOLTAGE	PHASE	AMPS	EST. SHIP WEIGHT (LBS.)
Water Blaster	1.103-484.0	High Pressure Cleaning	25	500	10	230	3	30	681
Water Blaster	1.103-472.0	High Pressure Cleaning	25	500	10	460	3	15	681

Dimensions (approximate):
 Water Blaster Physical: 42" x 59" x 62" Shipping: 49" x 27.5" x 48" Estimated product tare weight: 500

OPTIONAL ACCESSORIES

PART NO.	DESCRIPTION
8.711-863.0	Hose Reel, Cox 1/2"-100' 1175-6-100-CVXX
8.715-513.0	Water Blaster Unloader

Typical system layout of Water Blaster with CLT-600, Compact CoAg, and High Boy IPF
