

CE-180 WASTE OIL FURNACE

**GENERATE
SOLID SAVINGS
IN ADDITION
TO HEAT**

Our CE-180 Waste Oil Furnace is a cost-effective and eco-friendly way to heat mid-sized spaces.

With up to 175,000 BTUs of heating power coupled with an innovative new furnace design, the CE-180 will help your business start saving money immediately. And by helping to dispose of used petroleum products cleanly and safely, it's a smart way to generate free heat for your facility.

INNOVATIVE FEATURES:

- » Stainless steel heat exchanger for long-lasting durability
- » High-velocity, air-swept heat exchanger for more heating power
- » Vertical flue tubes resist deterioration & last longer
- » Easily opens for service & cleaning without tools
- » Unique design for longer interval between cleanings
- » Electronic burner control that starts every time
- » Fast ROI from reduced or eliminated heating bills

Acceptable fuel: used crankcase oil, transmission fluids, hydraulic oil, #2 heating oil, diesel fuel, most synthetic oils, or any mixture of these fuels

SPECIFICATIONS:

- » 175,000 BTU/hour input
- » 1.2 GPH max fuel consumption
- » 1,700/80° F air flow output CFM/heat rise
- » 115 VAC, 60 Hz, single phase, 20-amp breaker
- » UL and cUL Listed
- » Left or right side chimney outlets
- » 6" diameter stack outlet
- » Tank, wall or ceiling mountable
- » Hanging weight 470 lbs.
- » 1000+ hour cleaning interval
- » Over-center latches on clean-out doors
- » 10-year warranty on heat exchanger
- » 2-year warranty on parts (with completed warranty registration)
- » Made in the USA

INCLUDED IN PACKAGE:

- » Complete waste oil furnace
- » Electronic waste oil furnace burner
- » Pre-assembled, tested metering pump
- » Direct drive blower w/ 3/4hp motor
- » Inline oil filter w/gauge
- » Barometric damper
- » Digital wall thermostat

Stainless steel components resist deterioration and last years longer than the competition.

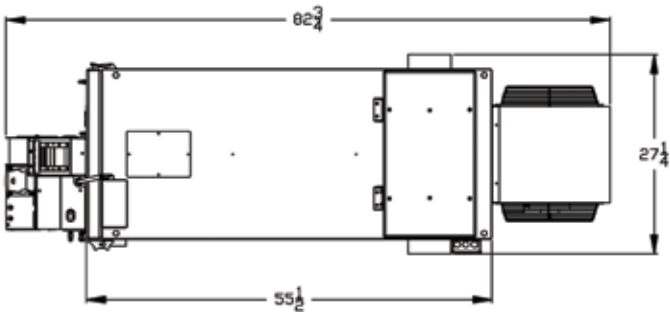

Over-center latches and smart design allow fast access for cleaning and service, without tools.

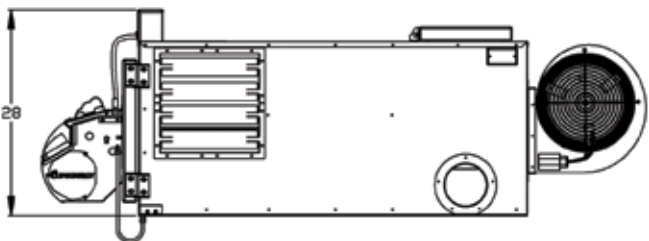

High-velocity, air-swept heat exchanger provides far better heating power and efficiency.

- 1** Squirrel Cage Blower for Quiet Operation
- 2** Easy-Access Clean Out Door
- 3** Over Center Latches for Easy Access
- 4** Precision Electronic Burner Control
- 5** Louvers Can Be Positioned at Left, Right or Bottom of Unit
- 6** High-Quality Stainless Steel Heat Exchanger
- 7** High Velocity, Air Swept Heat Exchanger
- 8** Stainless Steel Vertical Flue Tubes for Easy Cleaning
