WALL MOUNT SINGLE/TWIN - REMOTE

Standard Installation

Flammable

Warning

Low Voltage

Hot Surface

TOOLS NEEDED:

-  1/8", 5/16", & 9/64" Allen Wrench
-  Waterproof Wire Connectors
-  Crimping Tool
-  Safety Cable
-  Mounting Hardware
-  Mounting Hardware for Substrate

INSTRUCTIONS PERTAINING TO A RISK OF FIRE, OR INJURY TO PERSONS IMPORTANT SAFETY INSTRUCTIONS

Lighted fixture is HOT!

WARNING - To reduce the risk of FIRE OR INJURY TO PERSONS:

Turn off/unplug and allow to cool before replacing lamp/LED. Fixture gets HOT quickly! Contact only switch/plug when turning on. Do not touch hot lens, guard, or enclosure. Keep fixture away from materials that may burn. Do not operate the luminaire fitting with a missing or damaged shield. Do not touch the source at any time. Use a soft cloth or gloves. Oil from skin may cause damage.

SAVE THESE INSTRUCTIONS

IMPORTANT SAFETY INFORMATION - READ, FOLLOW, AND SAVE ALL SAFETY AND INSTALLATION INSTRUCTIONS

- Product must be installed by a qualified person in a manner consistent with its intended use and in compliance with the National Electrical Code, Canadian Electrical Code, and all Local and Provincial Codes.
- Follow product label information and instructions.
- Qualified Personnel with appropriate personal protective equipment must perform all servicing of this product.
- Before wiring to power supply and during servicing, turn off and lock out power at fuse or circuit breaker before service.
- The use of accessory equipment not recommended by the manufacturer or installed contrary to instructions may cause an unsafe condition. The use of damaged components may cause an unsafe condition and void product warranty.
- Do not block light emanating from product in whole or part, as this may cause an unsafe condition.
- Never operate the fixture with missing or damaged lens. Lens must be cleaned on regular basis.
- Entire fixture may become extremely hot. Do not touch hot lens or fixture body.
- Replace LED assembly only with correct wattage and type of power supply appropriate for LED assembly.
- All gaskets, o-rings and sealing surfaces must be kept clean during installation and service; failure to do this may cause an unsafe condition and void product warranty.

IMPORTANT LISTINGS AND CERTIFICATIONS

- Suitable for wet locations

REMOTE WIRING

LED Driver

Remote driver installations require inter-connected wiring between the LED and driver. Drivers have specific wiring requirements between these components. Driver manufacturers regularly recommend the following wiring details for such installations:

- Do not exceed 50 foot overall wiring distance using 12 gauge copper wire.

Failure to comply with specific wiring requirements will void product warranty.

DRIVER HOUSING REQUIRED

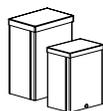

Please refer to specified remote driver housing documentation for detailed installation instructions.

REMOTE DRIVER HOUSINGS:

- PM2RM - Universal Power Module 2 Remote
- PM2DRM - Universal Power Module 2 Dual Remote
- RM - Remote Wall Mount
- DRM - Dual Remote Wall Mount

PM2RM & PM2DRM

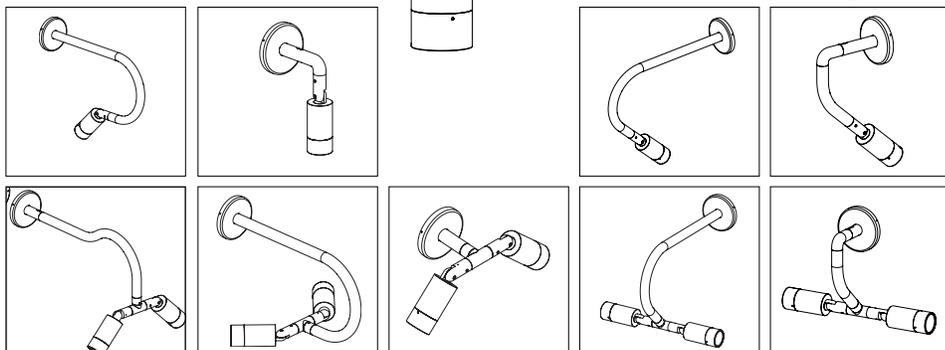

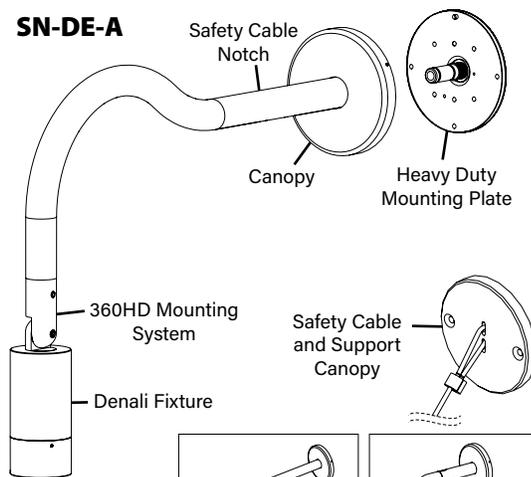

RM & DRM

This set of instructions works for:

- DE-WM-A - Denali Wall Mount Style "A"
- DE-WM-B - Denali Wall Mount Style "B"
- DE-WM-L - Denali Wall Mount Style "L"
- DE-WM-F - Denali Wall Mount Style "F"
- DE-WM-G - Denali Wall Mount Style "G"

Standard Installation

DENALI

WALL MOUNT SINGLE/TWIN - REMOTE

Phase 1 - Rough In

Installation of Back box

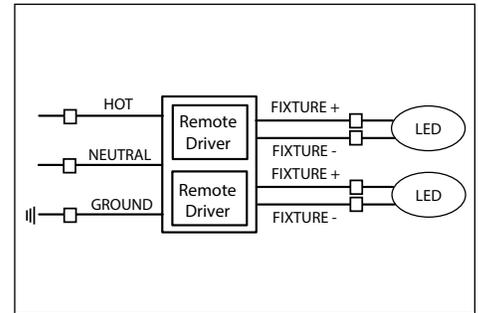

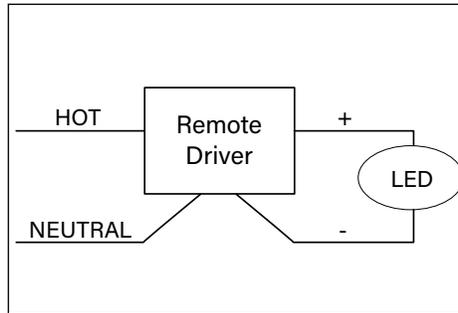

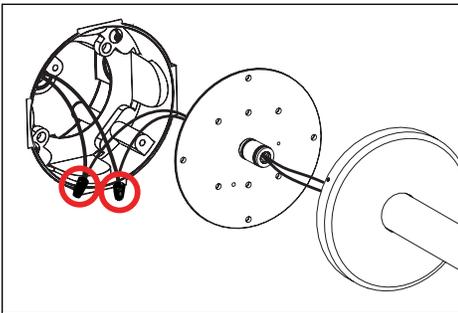

Additional Info

- Please follow National and Local electrical codes for your area.
- Suitable for through wire.
- Suitable for installation into combustible materials.
- Rated for 90° C.
- Junction box, universal mounting ring screws, box mounting hardware and gaskets (not included).

1. Install Conduit (not included) to be used with this product.
2. Install box so that front face is flush with finished wall. Seal building envelope as per NEC.
3. Connect box to conduit and pull wires for connections (**See wiring diagram**).

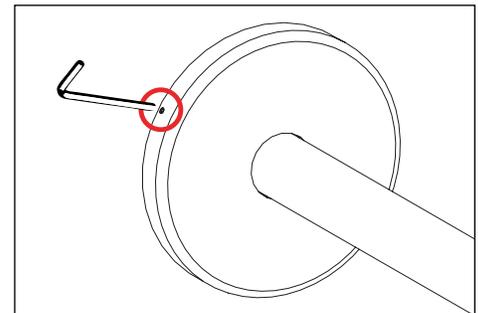

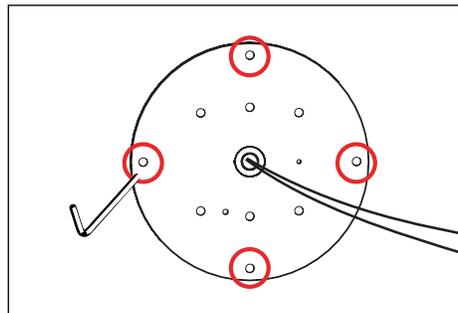

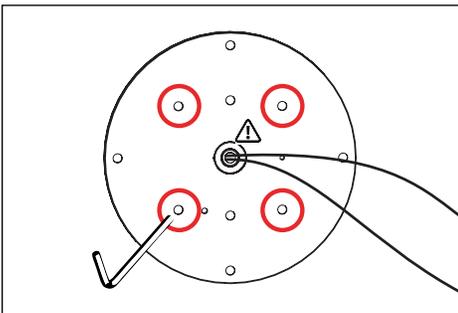

Phase 2 - Finish Installation of Fixture

1. Pull fixture leads through heavy duty mounting plate. Make watertight connections from remote driver to fixture leads using waterproof wire connectors. **See wiring diagram.**

WIRING DIAGRAM - SINGLE FIXTURE

WIRING DIAGRAM - DUAL FIXTURE

2. Install mounting plate (included) with #10-24 screws using a 1/8" allen wrench onto back box. Circled locations are available mounting holes for back box installation.
3. Circled locations are mounting holes for mounting heavy duty mounting plate to substrate. Use mounting hardware suitable for substrate material. **Seal building envelope as per NEC.**
4. Ensure fixture leads are inside junction box. Mount fixture canopy to junction box over mounting plate using three (3) #8-32 set screws with a 9/64" allen wrench.

For fixtures with stem length greater than 36", fixture will not support itself. Structural support cable *must* be installed in the field. Please read page 3 for support canopy and safety cable installation.

Standard Installation

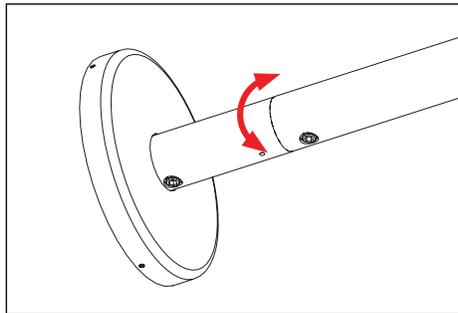

Safety Cable Installation Instructions - If Required

! Depending on fixture stem length, fixture will not support itself. Structural support cable must be installed in the field. Please read support canopy and safety cable installation.

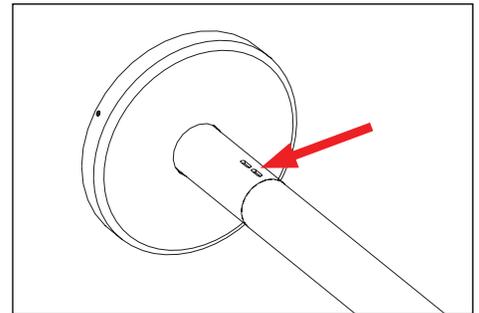

SN-DE-A	Stem greater than 36" inches	ST-DE-A	Stem greater than 36" inches
SN-DE-B	Stem greater than 36" inches	ST-DE-B	Stem greater than 36" inches
SN-DE-L	Stem greater than 36" inches	ST-DE-C	Stem greater than 36" inches
SN-DE-F	Stem greater than 36" inches	ST-DE-F	Stem greater than 36" inches
SN-DE-G	Stem greater than 36" inches	ST-DE-G	Stem greater than 36" inches

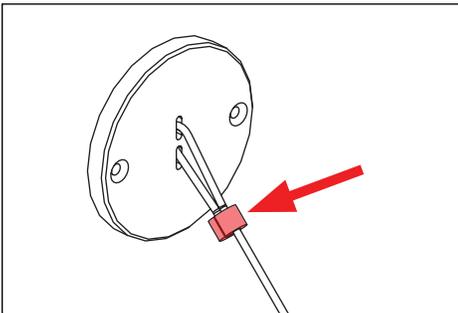

5. Mount support canopy above fixture location using appropriate mounting hardware for surface. **Seal building envelope as per NEC. Do not overtighten.**

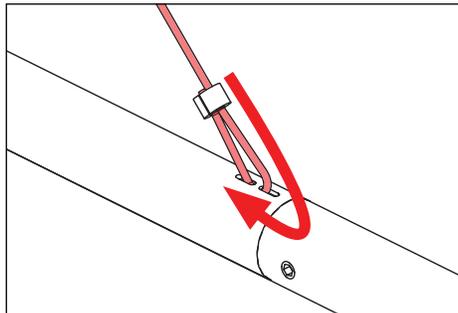

6. Adjust stem so that cable notch in stem lines up with support canopy location and cable. Loosen 3/8" set screw in stem to adjust.

7. Tighten set screw when cable notch in stem is in line with support cable and support canopy.

8. Thread aircraft support cable through support canopy cable notch. Loop and fasten with compression fitting. Use proper crimping tool to close compression fitting.

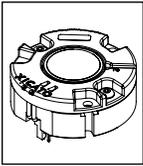

9. Thread aircraft support cable through cable notch in stem. Loop and fasten with compression fitting. Use proper crimping tool to close compression fitting.

! Fixture will not support itself. Structural support cable must be installed in the field.

IMPORTANT LISTINGS AND CERTIFICATIONS

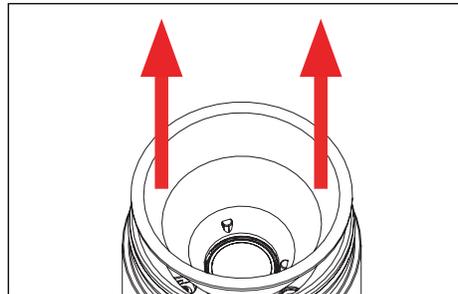

- Suitable for wet locations

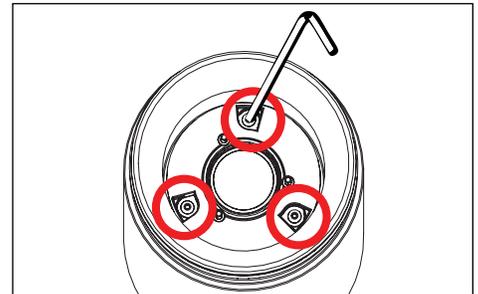

This product is available with field replaceable components. Exclusive interchangeable modular LED components with quick disconnects simplifies upgrades and maintenance when necessary.

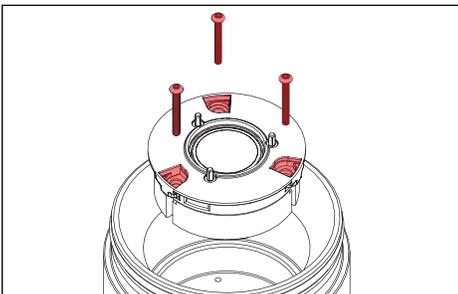

1. Use a 5/64" allen wrench to slightly loosen three (3) #8-32 stainless steel set screws to remove cap.

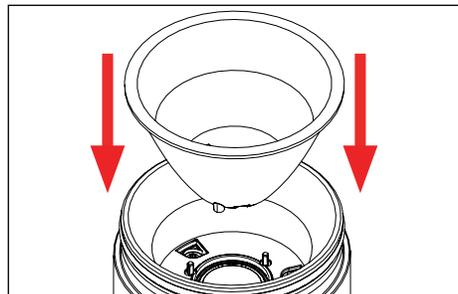

2. Remove optic by pulling gently and lift up.

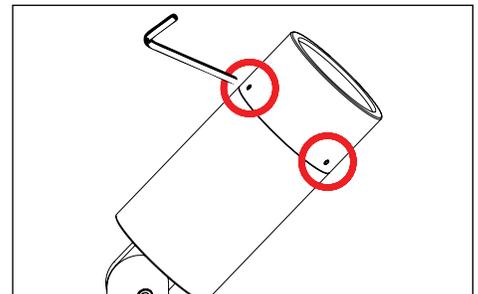

3. Use a .050" allen wrench to loosen three (3) set screws holding optic holder and LED module.

4. Gently lift LED module and disconnect from fixture. Install new LED module. Secure set screws through LED module and optic holder using a .050" allen wrench.

5. Replace optic by lining tabs with optic holder, then pressing down gently until secured into place.

6. Place cap on fixture and tighten set screws until they are flush with the cap.

Do not pull on connector or wiring. Handle with care.

Warning: Do not over tighten set screws. Doing so will compromise o-ring seal and will void warranty. Cap should be able to rotate without force.

IMPORTANT LISTINGS AND CERTIFICATIONS

- Suitable for wet locations • Additionally suitable for mounting within 4 ft. of the ground

360HD Knuckle Mounting System

1. Use a 3/16" allen wrench to slightly loosen one (1) 3/8"-16 set screw on the knuckle for 360° aiming purpose.
2. Rotate fixture at base and aim fixture to desired horizontal location.
3. If the over-rotation protection pin is in the desired aiming position, do not force the fixture past the limit. Using a 3/16" allen wrench, slightly loosen both set screws in the knuckle, enough to move the fixture freely on both axes.
4. Flip the fixture 180 degrees over the knuckle. The rotational range limit will now be 180 degrees from the original position. Now rotate the fixture into the desired aiming position.
5. Secure aim by tightening one (1) 3/8"-16 set screw using a 3/16" allen wrench.

⚠ Rotating the cap may be necessary for proper weep hole and cutoff position

⚠ Warning: Do not over tighten cap set screws. Doing so will compromise o-ring seal and will void warranty.
